Preface

Pakistan is engulfed in severe Terrorism for almost three decades now. During this period many civil and military governments have ruled in Pakistan but none could address this ever growing issue of Terrorism. The primary reason for this being the fact which the author of this book Ustad Hujjatul Islam Syed Jawad Naqvi (h.a) presents is that the roots of terrorism are not targeted. This book is a well compiled journey into the subject of terrorism which is the most painful atrocity in Pakistan specifically on the Shias and some other sects as well. It is a compilation of more than two years of Friday Sermons delivered by Hujjatul Islam Syed Jawad Naqvi (h.a). In this book only those parts of the political sermons are compiled which were relevant to the subject of this book. The book is divided into four chapters which starts with the Victims of terrorism, the roots of terrorism, the effects of terrorism and solution to end terrorism. The book ends with a final chapter which is a comprehensive analysis of where Pakistan has reached after seventy years of independence.

Ustad Syed Jawad (h.a), the author of this book is the Chairman, Principle of Orwatul Wuthqa Seminar which hosts more than one thousand boys and girls resident students. He has been blessed by Allah (s.w.t) with a deep divine insight into political matters. The political analysis of current affairs done by Ustad is precise and philosophical whereby he analysis the causes behind issues; and beyond this is the predictions he does about the upcoming issues. This prediction is purely based on the fundamental knowledge of sociology, political sciences and Islamic Ideology which he possesses.

This book is a framework guidelines to understand the globally burning issue of Terrorism. Though the book primarily focuses on Terrorism in Pakistan but it is equally useful for others as well; as we can understand from where terrorism stems out and proactive action plans can be setup to control this problem which is threat for everyone globally now. For

those global agencies of various Islamic and non-Muslim countries who desire to control terrorism this book provides significant value to them to understand the roots of terrorism and how this spark turns into flames when few national authorities under foreign influence nurture their desires and personal interests. The flames of terrorism are massive to the extent that it can burn an entire nation; the nation that gets into bewilderment and does not find a path of salvation from this plague.

The appreciable part of this book is that it is not just a complaint, mourning, accusations on what is happening in Pakistan as regards to terrorism but first it is addressing the masses and providing a solution to this problem. Ustad Syed Jawad Naqvi (h.a) with his deep political insight and strong Islamic Ideological foundations spans across the various dimension of this global issue and presents practical solutions to solve this problem in a manner by which entire humanity gets freedom from this disease. This makes this book a must read for everyone who feels the pain for terrorism and desires by their heart to cure Pakistan and other Muslim countries from this disease of terrorism.

Chapter 5: 70 yrs of Independence	111

CHAPTER 1

The Victims

Wave of oppression against Shias

There is a wave of oppression and aggression by the enemies of Islam in the world and mainly in Pakistan. Pakistan is their nursery where they plant the sprouts and then reap the fruits elsewhere. They have no intention anywhere to stop this terrorism and cruelty. In Pakistan they want to end terrorism and we also accept their claim that they want to end terrorism; but which type of terrorism? That terrorism in which no military base is a target, in which no government office is a target, certain communities are not a target, but the terrorism in which Shias are the target, they have no intention to stop it. We have not even seen a single sign, and no one can prove that the terrorism that is targeted at killing Shias is planned to be stopped. You have seen that when Ismaili's were attacked within a week they took action, caught the master minds also behind it, and pledged that we will not allow any such thing to happen to the Ismaili and Bohra community in Pakistan. Similarly, they have pledged to give protection to Christians as well in Pakistan, but for Shias there is no intention to do anything for their protection. The blood of Shiite has become cheap and free to be shed anywhere in the world, and an important point is that even Shias in Pakistan don't have any practical intent to stop this terrorism also. Though the Shias want to and have the desire that this terrorism on them should end, but practically there is no step taken by the Shias themselves to stop this.

In May 2015, the Indian National Security Advisor (Ajit Doyal) and the Interior Minister (Rajnath Singh) issued a statement that we will fight 'terrorism with terrorism'. We will send terrorists inside Pakistan to

counter the terrorism infiltrating India from there. They have given an open and explicit message, and the national security advisor openly said that why should we let our forces get killed in fighting the terrorists from Pakistan? We will create terrorists inside Pakistan, so even if the terrorists get killed it will be their own people. The attackers and the ones being attacked should be their own people only; and Pakistani should attack Pakistani only, and this came in the news. Certain news gave a very small glimpse about this, and this is a technique to hide or show less importance to a certain issue. These are media tactics and you should not take this statement lightly as they have clearly announced that this is their policy that they will implant terrorists in Pakistan. The government of Pakistan whatever they plan to counter this is a different debate, but at the end the targets will be Shias. The government has already taken steps to protect military bases and have punished those also who were involved in these attacks but the Shiite is a victim across the world and more so in Pakistan.

A wave of terrorist attacks started with the major attacks in Quetta in the early 2015. The next phase of terrorism that is about to come in Pakistan is the ISIS phase, specifically after ISIS has been ousted from the primary dens in Syria and Iraq. The terrorists and their hosts are the same; they have not changed and only their titles change, because for the sake of the tasks that are given to them they have to change the title also. In the past they would drop a bomb in a mosque, or come and fire on a mosque and run. Then they changed the strategy and moved towards suicide bombing. The next phase which they had started in the past, but which they started aggressively in Pakistan since 2015 is the phase of creating fear by doing worst acts of cruelty. The believers globally, but specifically of Pakistan should be aware that they are trying to make ISIS in Pakistan and the ISIS will not come from outside, instead they will create it from the inside. In the beginning their aim was to count how many Shias are killed. Then they

moved to the phase of target killings, and now the phase is to spread extreme terror, fear and awe amongst Shias and by spreading this terror they have to derive results.

Shia's optimistic imaginations with Anti-Terrorist Operations

The incident of the cruel leading terrorist (*Malik Ishaq*) who got assassinated in a police encounter on 29th of July 2015 made the believers of Pakistan happy, specifically the Shias and they should be happy about it. He was the cruelest of the beasts that have gone to hell and they were the ones who had been brutally and openly killing Shias; they lived under this system with the support of these organizations. They openly killed Shias in broad daylight and after they were arrested, they were later released without any charges just to make them heroes. They were taken to courts, and shown on media so that they can become more of the heroes. At the end they went to hell and Pakistanis become satisfied even if one such beast gets killed. It is true that one tyrant has died but it will be foolishness to consider that now there will be peace everywhere. This feeling of believers (*Momineen*) should not become basis of this false imagination that now the oppression bestowed upon us has ended. These beasts were so bold, that they openly declared in front of judges that they have killed so many Shias. Since the judiciary system of Pakistan is British, and in British laws the process of investigation of judiciary hides and lingers the cases forever. For a small property case it can take 30 years in Pakistan to get a decision. The judiciary process has been made so complicated and lengthy that this process does not allow the case to reach to the perpetrator of the crime and hence the punishment. The most successful lawyer in Pakistan is the one who is an expert on lengthening this process. The process has written so many unnecessary things, like e.g. what is the paper size, etc. and about this minor thing only they spend their entire time of the legal cases. Also,

there is a strange system of witnesses by which the victim can be protected or punished.

These people were being trained to do these activities and a time comes when these people become a threat to their masters. Recently there was a news of some murder victims who had killed a Pakistani leader in London. The moment they landed at Karachi airport and came out they were arrested within the airport premises and taken out from a separate route. These victims were in London and after the assassination they returned back to Pakistan. As they came out of the airport there was another squad of the terrorists ready to kill them because now they had become a threat even for their master. If these killers would not have been arrested inside the airport, they would have been killed outside. The Ministry of Interior has said that we had given access to Scotland Yard about these victims to take action. At times these killers are killed from inside, only because they have turned into threats for their masters.

Although there is no doubt that this is good news but we should not fall prey to a false imagination that good times have come. We should think that old terrorists have died and young ones are now coming.

False expectations from government

They have not given Shia's even this much of a right that such a big cruel beast should have gotten hanged for assassinating Shias, which could have proved a lot to the world; but they did not allow this to happen instead they killed him in a police encounter with some other reason.

This is a very significant point because laws are meant and made to nab such people, and they should have confessed that we are seizing him or killing him for these past cases of killing Shias which he openly confessed but they don't want to do this because then a lot gets proved. It would get

proven that this person was a criminal of Shiite, those who developed him are criminals of Shiite; those who protected him, those who released him from court were all criminals of Shiite, and hence many other criminals would get exposed which they don't want to happen. They have done the same before also with someone else that they killed in a police encounter. The believers think about such incidents with simplicity and think that something very good has happened. When a staunch criminal of Shias was not permitted to be proven as a criminal of Shias, it means there is some other planning for Shias. They do not allow Shias to take credit and are not permitted to present him as a criminal of Shias. They could have got him in front of the court and punished him because when an accused confesses that I have killed and will keep on killing, then you don't need any witnesses also. You should have killed him for the same crime and many others also like him. They have given a certification to these criminals and thus eliminated the confirmation that these were criminals of Shias. The believers should end their simplicity and *naiveness* and develop sense and awareness.

Saddam was hanged on the day of Eid, and in that year I was in Mina and this news came there. The believers got excited and one believer congratulated another believer. The other believer said that I am not at all happy because this did not happen through the hands of believers; one big *Shaitan* killed another *Shaitan*. I would have been happy when Saddam would have been sent to hell if killed by the hands of Shias or at least hanged in the name of killing Shias. I immediately got up and hugged this person and felt happy that we have at least some Pakistanis who possess this level of sense. To become happy that some leaves have fallen down but the branches, the stems and the roots are still present, this means not possessing sense. You have seen in the last two days how many funeral prayers have been offered for these killers, and all those who have done this are criminals and part of this system.

If you really want to end terrorism and it is the duty of the government to do this and protect the country. But they have no intention to end this system of evil terrorism. You see this always happens that whenever a terrorist is killed, several groups start to offer his funeral prayers and they all do this because they are all part of the same system and support the ideology. These big names that are still present; for them at least this would have gotten documented that these people were killed for Shia killing, and at least at a judiciary level it would have gotten proven that Shia killing is a crime in Pakistan. But they have not allowed to register Shia killing as a crime even now. As mentioned before also that a person wrote an article in the newspaper about the terrorist incidents that happened in Pakistan this year. He wrote a few incidents and said that these big terrorist incidents have taken place, but he did not write a single incident even as a reference about a single terrorist attack on Shias. This is their mentality that they do not allow Shia killing to become a crime. Their Judiciary system, media and establishment does not want Shia Killing to become a crime in Pakistan.

A farmer who cultivates his field does not destroy it himself, i.e. except to show off something he might do a little to deceive people. It is evident that a lot has been spent in making of these terrorists. A big quantum of Saudi oil wealth has been used for the making of these terrorists, hence they will never allow this to happen and also protect their structure. The believers should not allow two things to happen to them and i.e. Quran says two things are not worthy of believers. If you are believers than you are privileged with two things; one is that should you not become weak, and second you should not be afraid.

If you think that these people will protect Shias, you want government to give security to Shias, you want to seek refuge from these government crocodiles, you should then first remove these feeling from your heart and

Allah will make you the honored ones. You are in such big numbers that you can protect yourself and can eliminate your enemy also. You have so much potential but if you expect this from these people, then this an illusion from which we should come out.

With reference to the Anti-Terrorist Operations in Pakistan for eradicating terrorism; if in reality there is an operation going on in the country to end terrorism, then you should target the roots, and only on that day the roots will be eradicated when Saudi Arabia's intervention in Pakistan will end. If there are means coming from them and certainly there are people in Pakistan who are supporting them; then in this case a few killings do not prove that terrorism will end in Pakistan. And whatever is shown on the media is only fooling and insulting the people. The Media has been fooling around with people and consider Shias as fools. This is a big insult of a community when they are considered as fools and insane. When a new born arrives in a home a small child asks from where did the new born came from; the answer we give is that we brought him from a shop etc. because we cannot give the right answer to this question. The entire community is informed about the security and national issue in the same way the child is told that it is brought from a shop. You should pay attention that how media is playing and fooling the believers.

Now the media is presenting that two years ago Mullah Omar had passed away in Karachi. They are now telling this after two years to the people. This is just one grain of the rice from the entire lot, that their own pawn, whom they themselves nurtured, and now after two years they are saying that he had died. So what trust do you have on this media? Are they showing facts and realities? So, do you think that rest of all which they are showing is true? All these big thinkers who sit on media channels in talk shows; can anyone of them come and say; that I am also a fool that I did not know that he had passed away two years ago. They brought Osama in

Pakistan; he died and then they played a drama with his dead body in Abbottabad. You should not trust even 1% of this corrupt media, who is not showing any realities of any segment; neither politics nor social.

Even now when they announced that a terrorist group has been killed in Muzaffargarh, and on the other side a leader of these terrorist groups Mullah Omar's death news is released; both these two incidents and some other incidents that are about to happen in the next few days are pointing towards a new game. This news is being released for some new planning which has been done already, and for activating that new game they are creating this scenario. The lesson which is for us from these incidents is that we should not become victim of false imaginations.

“Balance Policy” of Government in Anti-Terrorism Operations

The politicians of Pakistan are claiming that we are cleansing terrorism from Pakistan. It is essential that in this scenario we should also express our stance on terrorism, specifically because we Shias are the biggest victims and targets of terrorism, and in fact it was started for Shias. Terrorism will never end if you try to clean up its stems and leaves; it can only end if you eradicate its roots. This nation is under this calamity for the last thirty years and today those who are claiming that we will clean the country from terrorism; where were they in these thirty years and why did they not purify it before, and in fact why did you start this terrorism in Pakistan? What was the need for it?

Since we have been the biggest targets and victims of terrorism they should also consult us in this, but if they won't then we have the rights to express our views about terrorism, because we are the ones who have suffered the biggest losses. The fact is that neither the media nor the government, even counts or considers Shia killing as an act of terrorism. You can read the news articles and columns that when they talk about

terrorism they only list attacks on schools in Peshawar, attack on some government institute or some military posts but they do not mention anywhere about any attack on Shia mosques, centers and personalities. They just do not count Shia Killing as terrorism, and I have not come across any media news which declares attack on Shias as terrorism, although they reckoned the attack on Ismaili's of Karachi as terrorism.

One important point is that there is a difference between encountering a terrorist and encountering terrorism. What is being seen now is that the raids, the arrests and the pressure is being put on terrorists. Even if you arrest terrorists, still terrorism is the name of some other reality and by ending terrorists terrorism does not get eradicated automatically, but if you eliminate terrorism then terrorists can get annihilated. You cannot end terrorism by terminating terrorist groups and parties, because terrorism has its own elements and roots, which need to be removed first.

I would like to mention this that the strategy that is currently made against terrorism is not correct, and it will cause more damage and that it is the "Balance Policy" strategy of government. You are aware that they have started an arrest and raid operation; many Shia believers are arrested; many scholars are arrested in various cities; they are making plans for arresting some Shia Scholars and top of the list is Maulana Amin Shahidi against whom FIR was made after which he was released on bail, and now his bail is also suspended under the incident of Ashura in Rawalpindi. There is also news from other cities that believers are arrested and they say that this is part of the ongoing anti-terrorism operation. They are arresting Shias also so no one can say that one sided operations are going on. They say it is an operation against terrorism but at the same time we have to arrest Shias, so that this impression should not go that it is one sided activity that is going on. They will arrest terrorists, and the victims of terrorism are also arrested so that no one

can accuse us that we are carrying out one sided operations. What is this balance you are doing by arresting both the killers and also those who are killed? This balance policy is destructive that the moment you arrest one terrorist you want to arrest one of us also, so that you should not be accused of one sided operation. This is unfair, injustice, and oppression and in fact a form of spreading terrorism. You have the right to arrest those who are criminals of law, but just for the sake of balancing the equation, that if some terrorist is hung then you have to hang someone from the victims also. With this policy the terrorism will spread more, and those who were first the victims of terrorism and now they are becoming the victims of government and law. The FIR which was issued against Maulana Shahidi, it was issued without any evidence and only on the basis of suspicion and due to someone's fervent complain, this is unfair. Which means that anyone can complain against anyone he likes, and you will arrest the accused without any evidence? This is not right and this balance policy should change.

This policy of unjustified, illegal arrests has been a policy for Shias forever, whereas everyone clearly knows who the terrorists are; the groups, the people, their leaders are all known to everyone. They are doing this because if they only take steps against one group then it will be one sided hence they target all groups. It is like there are bandits in one area and in order to catch them you arrest others also who are not bandits so that the bandits don't complain that you are only arresting us. What kind of logic is this? You are arresting a full village of innocents so that a balance is maintained, and to give an impression to other sects and terror supporting groups and parties? Shias are the victims of this illogical thinking in Pakistan. Those who are a threat for the insecurity of Pakistan and it has been proven for years that they are not well-wishers of Pakistan, but in order to arrest them they have made this justification to arrest others also. If they are criminals then arrest them and tell them for

what crime you have arrested them. For a long time there have been several innocent people arrested and their families are also not aware about their whereabouts, and only Allah knows what difficult time their family members are going through.

The Shias say that we have learnt only patience from Karbala, which means you keep on killing us and we will sit in some *Hussainiah* and mourn in patience. Patience does not mean that we will sit silent in some *Hussainiah* and mourn. The Shias are loyal to Pakistan; they are amongst those who made Pakistan and Shias are involved in every phase of Pakistan, so the Shias have the rights to get security and protection in this country. Oppression and injustice should neither be done by terrorists nor government, and those Shia scholars and believers who have been arrested should be released.

Terrorism in this country will only end when its roots are eradicated, and everyone along with Shias desire the most that terrorism should end in this country. The Interior Minister has issued an encouraging statement two days ago, which became a headline in the news. He said that now in Pakistan no one will have the rights to declare anyone as Infidel (*Kafir*). You have banned this permission of titling anyone as Infidel very late, because for the last thirty years you have granted the permission, a chaos was committed in these years, but still we are happy that at least you have said this today. It is still not late even if you can stop this today after thirty years, and make this a law and crime that anyone who declares anyone else as Infidel (*Kafir*) should be arrested and the same punishment should be pronounced which the Religion has established for this slandering. This is a motivating statement, but if this comes under your "Balance policy" "i.e. you don't want to call and arrest those who call all other Muslims as Infidels (*Kafir*), but for the sake of balance you want to arrest people from this side also, then this will also become ineffective.

Making Pakistan insecure for Shias

Since 2018 is the year of election, so starting now the corrupt and abased politicians have started to create a dirty atmosphere everywhere; in newspapers, and on TV. The language that these politicians use against each other is something to be ashamed about, and its front of everyone; but still some scholars visit their functions, some listen to them on TV with so much attachment that it's amazing. I have seen some scholars taking so much interest in the words of these politicians that they listen and read to each and every word of these politicians. It is not worthy of a real man to even listen to the words of these ignorant, and corrupt politicians, but still some take so much interest in them that its mind boggling. These politicians are intentionally taking the circumstances in ambiguous and bogus directions. They are triggering topics like *Panama Leaks* which are baseless and they involve the entire community in it. They made this as a big community issue i.e. the courts, politicians, and armed forces everyone got involved and on every page of the newspaper the same topic is repeated. This is the real corruption, that a non-serious community has been pushed into such deviated path and atmosphere by non-serious leaders. This is the national environment which is being made and this will become worst day by day. Those who cannot even talk properly are arranging functions, going on TV programs and giving statements. One flock of sheep will attend these functions, another will watch them on TV and the rest will read it in the newspaper. In these programs and talk shows these politicians talk filthy things and people create commotion there, and the scholars are reading and listening to these things for hours. This way the masses and scholars will remain negligent of the real issues and the topics of life, and then they give this Satanic practice the name of Politics.

Under these circumstances certain things are being done which are not being noticed, and these are being done against the followers of Imam Ali (a.s). In April 2017 a car of believers was bomb blasted and some believers were martyred in Parachinar. This town of Parachinar has been made a target and it is not like the same wave of terrorism which happens at a certain time. This is something pre-planned like they did in Quetta and they want to derive some results out of this. That plan is still ongoing in Quetta by which many were martyred and the results which they wanted to take from that, they have taken. There was such a big Shia population settled in Quetta; they wanted to disperse and disturb it in all possible ways. Like they affected the business of Shias in different parts of the city and as a result many Shias have closed their shops in the main market, and moved it to other areas. When you force someone to move their business from the central market to small areas, they are creating this feeling for Shias that this land is insecure for you and you will always remain insecure here, and hence people should move to secure places. They did just that, and now from Quetta many have moved to Australia and other places. This conspiracy was applied hands-on in Quetta, and now it is being applied in Parachinar and even for Gilgit, Baltistan. They are creating an insecure environment in these places for Shias so that these populations themselves will migrate from these places and gradually these lands become evacuated, and only a minority stays there who stay silent or go under cover. Now there is an agency area of Pakistan, Orakzai Agency. This was amongst those areas of Pakistan where Shias were settled in good numbers, and Shias moved out from here before Taliban entered there. For a few years before the Taliban came, the locals there would take '*Jiziya*' (Minority Tax) from Shias to live there. After that Shias moved out from there, and now that the armed forces kicked the Taliban out, and the families were asked to return back, they are still afraid to come back. These are the facts of real Pakistan which are

taking place in real life, and they give this the color of terrorism, and they give the color of sectarianism to terrorism. There is a political plan behind 'this terrorism' which is not local to Pakistan, but a global phenomenon which the Satan's have made globally against Islam and specifically against Shias. In this plan the tyrants, the oppressive Arab rulers are involved and are the front-line forces that massacre Shias.

The same plan has been implemented in Pakistan so that Pakistan can be declared as an insecure land for Shias, hence Shias lose their identity and become lost. Just like before the Islamic revolution there was no identity for Shias globally. Shias were not known beyond certain areas, and in the worldly affairs there was no attention towards Shias. This kind of lost identity was also done intentionally in part by Shias themselves i.e. to remain safe, and in some parts of the world the tyrant rulers had kept Shias suppressed. Shias had also compromised on the bare minimum and they were only seen in the ten days of Mohurrum, and the rulers tolerated this, that let them come out for ten days and after that throughout the year they were not to be seen again. But if they start to express their identity throughout the year, they present their ideology to the world, they are involved in global political affairs, and they play a vital role as well, this cannot be tolerated. Hence this pressure has been put on Shias to push them towards a community that does not have an identity. Like there were Shias in Bahrain, and Hejaz since centuries but no one was aware until sometime back and similarly in other parts of the world. A time came when with Islamic Revolution gave a status to the entire Islamic world, and took a stand against infidelity; similarly, this revolution and Imam Khomeini (r.a) also gave Shias their identity and got them listed on top in the list of all global Islamic issues. This was the blessing of the Islamic revolution and Imam Khomeini, and to stop this they carried out many plans, and all of them failed. They prepared Saddam and sixty nations supported him but that plan failed. They have been exerting all

forms of pressure on Iran because they believe if Iran becomes weak then Shias will be weak everywhere which is a fact by itself. In history Iran has been always Shia but they were weak, this is because the Shia Ideology was not present and was weak; hence globally as a nation it was weak also. Now when they have got this spectacular identity, it had a global effect on every weak community and naturally on Shias as well. They had this in mind before hand, that we should submit Shias in Iran and then everywhere else Shias will get demolished and weak automatically. But this did not happen and Allah gave more light to this lamp and Shias are becoming stronger day by day.

They made forces and groups in Pakistan and later they transformed this into a global force of *Takfirists* which they are supporting so that this force can annihilate Shias but this force itself is on the path destruction. This is their current state, and hence the new plan they have made is to create a joint Takfiri army of 39 countries, and they have made a Pakistani General as their commander. This drama which they have created, none of the Shias globally are afraid of them but this is their plan. They made this army by leasing forces from certain Muslim states. This was a battle of dollars and Rials; with this they want to finish Shiite.

CHAPTER 2

The Effects

Political Instability

In Pakistan the political instability is increasing day by day, and one big cause behind this national insecurity is due to terrorism. Time and again a new wave of terror attacks starts in various parts of the country and at times it turns into massive attacks. There is a reciprocal effect of the political instability and terrorism. They both effect and aggravate each other. There is a conflict between establishment and the government and as a result every segment of the nation is affected. Everyone is uncertain as to what will happen and this is dangerous for any country. Even if there is a most corrupt government but if they are doing something in a planned manner it is still better than a completely uncertain state of the country. Due to this political instability which has been going on since a long time, and the internal pressures from all directions; then foreign interferences, and then there are many elements behind the curtain, and this has affected everything in the country. This has also resulted into many other effects on the nation like economic crisis, threat from foreign elements, insecure borders and the loss of global identity of Pakistan. We will discuss some of these effects now.

Internal Weakness and Enemy infiltration

We can see the religious segment active in the field of terrorism, but those who got them into terrorism are not religious people. This is what has made Pakistan weak, and the organic system of Pakistan has turned so weak that the moves of the enemies of Pakistan are at their peak of aggression. We hear this very often, and once as I was leaving for a program and this person who had come from Sialkot, directly told me that

one of his relative's house which is on the Indian border has been bombed and he has been martyred. You can see how aggressive the enemy has become because there is weakness inside, and the enemy of outside knows this weakness and becomes aggressive. For the last few days it is coming in news that RAW agents have been arrested in Islamabad and Rawalpindi, and in Lahore one policeman was arrested as being the agent of RAW. RAW is India's secret Intelligence agency which has made a unit inside Pakistan for damaging Pakistan from inside. The Indian Minister has formally said that we will send terrorists inside Pakistan and there was no formal diplomatic answer given to India on this, in fact mangoes were exported in return. In Karachi they arrested an organization whose members confessed about the cities of India they have taken training in, and these things were published today in the newspapers. You should be aware that the camp which is made inside India for causing destruction in Pakistan is under the training of Israel. Israel has the expertise to cause destruction inside other countries, and it was the statement of our Interior minister in Ramadhan that we have such organizations and NGOs in Pakistan who are supported by India, Israel and America. Why has such aggression developed inside them? This is because there is extreme weakness inside our country, and the main cause for this weakness is terrorism.

National Security threat on borders

We all know that 6th of September used to be a national holiday which is no more a holiday. Today our children only know of those events on which there are holidays. 6th of September is a significant day which was titled as "Defense Day" but now forgotten, because we don't see the need of defense anymore? In 2015 around this day there were activities going on the border from the other side and were reaching their peak. This is because Pakistan is weak internally and all segments of Pakistan like

economy, life, and security are all weak. This 6th of September which is celebrated as Defense day when Pakistani forces defended their borders, but now when there was a threat on the border our Prime Minister had immediately gone to America with proofs that we have danger on borders. They have presented the proofs to America and Britain which again proves our weakness. If our borders are in danger then the enemies should also feel the same threat and panic. Why did you not inform this threat to the Pakistani community? You should have told the community that we have danger on our borders and when community becomes a defender of a country then no one can defeat them. This is the reason Yemen will never be defeated and even if all Arabs unite and attack Yemen then also it will not be defeated even if it turns to dust. This is because the Yemeni people are defending their country. For Pakistan, if America and Britain are going to defend it, then with such enemies disguised as friends of Pakistan, no one can protect Pakistan.

At present both internal and external difficulties are on their peak. We are given the impression that things are under control but when we see these issues taken up to America and Britain, we know that the issues are serious. So, the community should not remain unconcerned; the politicians and rulers have their own world but the community has their own world. Many politicians have come and gone but the actual inheritors of the nation are the community and the Ummah. The community also has their daily little issues to deal with, but this should not keep us unkempt from the national issues. The way Allama Iqbal has said that O Ignorant! You should think about your nation because calamities are about to come; your news of destruction are going on in heavens. For the defense of the nation, both dimensions need to be considered; the internal seditions should end and the external threats should be evaded, and these two things should be done with the contribution of the people.

America makes insecurity policy for Pakistan

Obama issued a statement towards the end of 2015, upon which some reaction was shown by some of our Politicians. He said that Pakistan will remain insecure for several decades and peace will not be regained. In his annual speech, Obama said this and some of our people just out of formality objected to this. Do not consider that Obama has prophesized something, he is not a *Waliyullah*. In fact, he has presented their policy for Pakistan. In order to materialize their policies for Middle East and other nations it is necessary for them to keep Pakistan unstable, and insecure for several decades. America has announced its policy, and no one replied to it because they do not have the courage to reply. You would have seen in the news that in October of 2015 American marines crossed the sea borders of Iran, and Iranian Revolutionary Guard Corps went there, arrested them and got them and made them captive. They made them apologize and then released them. You should also learn to preserve the sanctity of your nation that one person is burning the entire world, and he is announcing about Pakistan that it will remain insecure for decades to come. All the religious groups, organizations who take dollars to arrange big rallies for the defense of Pakistan this was the time for them to come out on the streets, bring out rallies for the defense of Pakistan. We should summon the American Ambassador in Pakistan and question him why have you announced this policy to make Pakistan insecure for decades?

Until the time these reasons are not controlled, Pakistan will not become secure and for this we need courageous politicians who can stare into their eyes, twist their hands and make them answer that how have you announced this policy? We need people with zeal, and valor who can take notice of such statements and reply accordingly. The people should also be attentive to this fact that who comes out to protest on small matters, all of them ignored or remained silent to Obama's statement, as if their

sage and godfather had issued a statement. As if a new auction has started to make Pakistan more insecure, and there are people who are ready to sell themselves or do anything for materializing the American policy of making Pakistan insecure for decades. This is the internal weakness that has developed in Pakistan, and the roots of this weakness lies in terrorism and corruption.

Impact on Education

Although the entire Muslim world is burning in the fire of oppression and terrorism, but amongst them the most effected country is Pakistan. In the January of 2016 due to terrorism gaining severity, all schools were closed down in the state of Punjab in Pakistan, right at the time of examinations, all due to the threats of terrorism received by them. Although they made these closures temporary and even issued a date for reopening but dangers don't have a date. First of all, the education centers were and are victims of other difficulties already, and now if they become victims of terrorism as well then what will happen to the state and the quality of our education centers? Similarly, all the schools of the army, and the government were closed due to the threat of terrorism and this is even for a long time an encounter is also ongoing against terrorism. All national resources are used to eradicate terrorism but still we have such threats that the schools also have to be closed. How much a generation is affected by closing schools? Since we are not serious people, we do not account for these losses.

I tell students to calculate, if a teacher takes an off for one day and he teaches 5 one-hour classes. In every class there are 20 students, then it means this teacher has wasted 100 hours of the community. Are 100 hours less time? In 100 hours big projects can be done, and we waste hundreds of hours like these for some silly reason of health, or guests etc.

With small excuses we waste 1000 of hours of our time. Who will bear these losses of closing schools at the time of exams? Then they will pass the students by taking money from them, or else the year will be wasted.

This phenomenon doesn't end and goes further and they will close colleges, universities and then they will close markets, or traffic. By shutting down the lives of people you cannot evade this danger.

We need to understand this tragedy from its fundamentals. If you are serious to end terrorism then understand it by its roots. Its roots are not these elements whom you catch. These people who attack universities like the Bacha Khan University in Peshawar or Army School are not the roots, they are the leaves of this evil tree. If you eliminate them then you are just removing the leaves, the roots and stem is still in its place. As mentioned before also that do not be happy during intervals. Intervals and gaps come in their activity because they are doing new preparation and will come back with more severity. Whenever there are breaks, or periods of silence in terrorist activities we feel there is no danger now. There are threats which close down schools, and universities and many university campuses are sealed because the security arrangements are not good enough. This terrorism has spread so much and so deep that despite of the full potential of the country being used, still they cannot control it, and they decided that they should close down these institutes and eventually bring the normal lives of people to a standstill due to terror threats.

Insecurity even for sports

In the mid-February of 2017 after a short period of silence, a series of assassinations and a new wave of terrorism again started in which innocents were being killed across the nation. From Baluchistan to the Western border the slaughter of men was happening, somewhere it was

police and some places were shrines of elderly saints. Amongst the bitterest incidents that took place during February 2017 which caused the most damage; one was the Lahore incident and other that took place in Sehwan in the well-known shrine of an elderly saint (Lal Shahbaz). There has been big loss of lives.

Prior to these incidents I have been reminding the believers (regularly in Friday sermons) that the breaks (periods of silence with no terrorism activities) that you see, you should not come under the deception of the media who is claiming that we have broken the back of the terrorists. I said that this is impossible, that they are breaking the back, or shoulder, instead they are only concealing them, and hiding them. They got the opportunity and time to gather their strengths. They are out in the field again and are carrying out operations wherever they want. They also came inside the sensitive places like Punjab assembly and there is no place from where they could be stopped. Terrorism has destroyed Pakistan and you can see the effects of Terrorism that the Pakistani cricket team has gone to Dubai in early 2017 to play national tournament. Every country's tournament is played inside their country and how is this country that a game which by the way also is a worst game and a sign of disgrace. This game of cricket came to us from British. That group has left this game in us as inheritance; those who made us slaves for centuries. The slaves like everything of their masters, but they cannot even play this game of their masters and have gone outside to play. The authorities are saying that we are trying to play the final of this tournament in Lahore but they are dreaded. Recently towards the end of 2017 they managed to arrange a cricket match in Lahore and the entire state was involved in protecting the stadium with all shops, offices in a big range nearby were asked to shut down. Terrorism has destroyed the industry, sports, politics, economy, safety and peace and nothing is secure in Pakistan. There is no

group in society that is safe, from the security forces who are also unsafe, to the common masses where everyone is unsafe.

Threat to Pakistan's atomic power

The more the instability is increasing inside the country the appetite of India against Pakistan is also increasing. They are issuing new statements every other day and come out with new policies against Pakistan. First, they were saying that we will interfere in Pakistan and carry out operations, and strike to attack terrorists inside Pakistan, (in the past also they said we have done this which Pakistan army denied that they cannot do this) and now their new statement is that we will attack Pakistan's atomic weapons and they want to take this power away from Pakistan. The actual issue for which all the pressure and besieging of Pakistan that is being done is to deprive Pakistan from this atomic power which it possesses.

Until now they have controlled two powerful atomic powers; one was Libya where we have seen what happened with Colonel Gaddafi, and second power was Iran which they have also curbed with the nuclear agreement although they are trying again to break that deal also. Trump is going to announce the new policy for Iran and has threatened Iran. The way he was making his tone hard against North Korea the same he is doing for Iran as well, and Iran is also giving a harsh response in return. Although they have controlled the atomic operation through the deal but they are saying that this not enough, there are other things that need to be stopped and they want to finish *Sipah* (IRGC) as well. The Supreme Leader of Iran, Ayatullah Khamenei has warned this before also that if you listen to them in the atomic case, they will come to your missiles next, and then when you listen to them on missiles then they will come to your forces. Trump is now pushing Iran to end IRGC as they are a terrorist

group according to him; the same kind of pressure he is applying on Pakistan.

This is the situation which they have created. The weakness which the Iranian government has shown and also the people to a certain extent, which America is using now to create more restrictions. They are already demanding to control all missiles, weapon plans and then IRGC, and eventually they will come to the main and final demand that is to end the system of *Wilayat-e-Faqeeh*.

The same is for Pakistan also by which first they were asking to end terrorism in Pakistan. Now the Indian army officers are saying that our plans are to attack the atomic weapon's site in Pakistan. They are creating such a vibe that the atomic weapons of Pakistan are not safe, and through America they are applying pressure on Pakistan to take this power away. All this is happening because of the instability and foolishness which has taken place *inside* Pakistan. They have created big difficulties for Pakistan outside in international groups, and they are drawing Pakistan into that direction whereby internationally Pakistan will be declared as a nation that supports terrorism and second they want to end the atomic power of Pakistan.

In the Islamic world; first Pakistan became the atomic power, then Iran and Libya whom they controlled and now they don't want any Muslim nation to become an atomic power. Those who did this in Pakistan like Dr. Abdul Qadeer Khan and many others who did this service for the nation have been punished; but they have done a job to make Pakistan strong and this should be a power of the nation which should be effectively used and preserved. But the followers of *Rials and Dollars* have brought down the character of Pakistan in the world. India since past has been against Pakistan but never touched this issue of atomic power. But after

friendship with Israel the tone of India has changed and Israel has destroyed the atomic plants of Iraq; they are after Iranian atomic power and then Pakistan. Israel had two plans for Iran; one was to get this nuclear development closed with negotiations, and the other was if this does not work we will create an alliance and attack Iran. The same they are doing for Pakistan. The instability inside the country is helping this.

Economic Crisis

The political instability whose one primary cause is terrorism and its political supporters, is effective on everyone. Inflation is increasing like a beast, and it is evident that when there is political instability then it will affect the economy as well. There will be black marketing, looting, chaos, panic and that is what is happening here due to the political instability.

The inflation has gone so high and this happens when political instability is present. Some days tomatoes are being sold at Rupees 300 per kg which used to be 10 Rupees per kg. Someday onions, or something else's price sky rockets, and all this happens when there is instability in the country. This inflation will put pressure on the people and a disorder may happen inside the country, which will benefit the external enemies who will take advantage of this internal chaos. The government's personnel claim that there are internal dangers but they don't do anything practically about it. They are busy in internal conflicts and want to destroy each other which is helping the outside enemies. The people of Pakistan are the only support for this nation. The ordinary people of this country have become uninterested to everything in the nation. They are just busy in their affairs on WhatsApp, TV channels, eating and enjoying. But if there is chaos then eventually the people will have to suffer.

I remember during the times of war in Iran, when we were in Qom we could not get the essential things like wheat, sugar, or oil and this was given on a portion basis (*Ration*). The eggs were given on tokens and everything which was essential for life at the time of war was disturbed. In Qom at that time there was one personality who became very famous in the markets. There were things available in black market but at very high price; 10 times more expensive. This person would come in the market in his car to buy things. He would come and buy everything at the black-market rate without any bargaining. The students of Qom would not even dare to stare at the meat because it was so expensive. The students would be able to eat meat only in some majlis which was also rare. When this person would come for buying meat he would not even ask how much is it. He would just say put this sheep in my car. The things which people did not even think about their price before buying; and would just visit shops, and markets and buy casually but now those basic commodities had also become a concern for a common man to buy, but not this gentleman. This is the corruption money and this situation comes up when economy becomes the victim, political instability is present and external pressure is there. All the pressure comes on ordinary people and those who are responsible for this they don't have any issues. They will buy everything at whatever rate. But the same people who are not serious and indulged into amusements, and dancing with the political parties will suffer; they don't realize what these politicians are going to do with them. There are thirty-seven terrorist supporting ministers (as per secret services report) sitting in the parliament and they are sent there by the votes of people. Who selected and elected them? Now the municipal elections which were held; it was in the news that in Lahore those who were elected amongst them 60% were criminals. Some of them were inside prisons and were contesting in elections from prison. This is the senselessness of the people and it is from their vote that all this happens.

I have always been saying one point which has recently come as a witness out of the mouths of the government too. I have said that that economy of Pakistan has been destroyed to a dreadful level, but no one discusses about this because no one cares about it. Their bank accounts, and stomachs are full hence if the community's economy is disturbed the rulers are not affected. Everything is to be suffered by the community, and the masses but this non-serious community can be easily tamed with any serenade. Eighteen hours of no power, but if the cricket is going on, the community is happy.

At present everyone is ringing the danger bell. The Chief of Pakistani army has pointed towards the economy and openly said this for the first time. He gave an example that the Soviet Union; Russia was the biggest power in the world, in terms of geography. Soviet Union even after division is still a big nation. The Army Chief said that the reason of Soviet Union being broken was not the lack of forces, but it was the lack of economy. They have taken up this subject, now that our economy has come to this level.

The international finance groups have rung the danger bell and they have changed their policy towards Pakistan. Every country has an economic value and based on that global financial institutes give them loans. It is for every individual or a company, like if you visit a shop to buy something and if you ask for credit, the shopkeepers give credit to some and not to others. This is based on the economic value of that person if he can pay back or not. If the bank gives loan to someone they weigh his financial status. They don't see the titles or the names of the persons and not by name or lineage they give loans. Everyone has a financial status and trading is done based on the value of that entity. These global institutes have devalued Pakistan and India has a big role in this in pursuing these institutes. They have seen how much export Pakistan is doing, how much are they buying, or trading and that decides the economic policy and then

do valuation based on that. The situation of Pakistan has become such that international firms cannot deal with them anymore. The value of Pakistan's economy will come down further and this is a bad news for us.

The reason for this are these politicians who are lavish people and in their lavishness, they have pushed the nation inside the jaws of destruction. Some financial experts should come and tell this to the community about what can happen and the upcoming days may be destructive. In the last few days the newspapers have published big conflicts between the establishment and the government, in which the economy issue was raised for various purposes. Due to the raising of this issue which government did not like, but due to this conflict certain things have gotten exposed. This is because there is an effect, when the economic weakness of a country is exposed, then foreign nations stop investing in the country. At present only China is trying to support and do business in Pakistan, but with this alarm others will stop. Even China has mentioned that their CPEC (China Pakistan Economic corridor) pact is conditional to security.

The Pakistani labor which is working in Gulf countries was a big economical support for Pakistan. It was a big dependency for Pakistan by which this labor was working outside and sending money to their families and homes which has a national economical affect. The second effect is from those friend countries of Pakistan which are these Arab countries. The American think tank has dictated a new plan to modernize Saudi Arabia and they have changed their economic policies, by which they want to remove the expats and replace them with their own people to save their economy. The first thing they did was to get rid of Pakistanis, similarly they are getting rid of Pakistanis from UAE. The Qataris who have hired half of our country for hunting, but they are not giving work visas to Pakistanis. Now gradually they will come out. As per Saudi Arabia by 2030 no expats will remain there. The sources of jobs, and work in our country

is getting destroyed, and the outside sources are getting diminished at the same time. The credit that was taken from outside is not being returned and hence interests are going up. Globally Pakistan will be declared as bankrupt. As India has said we will isolate Pakistan completely, first they did diplomatically and now economically. But till the time Cricket is there we are not worried. They are now paying big money to foreign teams to come and play here. Imagine if they can spend the same money on a power plant, but cricket is the cure, and ointment for the wounds of this nation. This is a very dangerous form of terrorism. The life of a common man will be very difficult due to the effects of this economic crisis.

On one hand there is political instability effecting the economy, and then on top of that the non-serious media. The way this dreadful media takes up these issues it makes it worst and severe. Whatever type of media you see they are all busy in spoiling and destroying everything, may it be print media, TV, social media and any other form are ruining everything. In such situations many damages are happening but people are not aware at all. It is like a patient inflicted with many diseases but he is not aware, hence no medicine, and whatever is happening inside his body is not known to anyone outside. The nations are also like this.

If a country becomes a victim of instability for a day, then just do accountability of the level of losses that happen in a day, they are unimaginable; if you see the figures they are scary. As an example, there are certain countries in which the power outages are not there even for a moment, but sometimes due to some accident this incident happens and power goes off for a few. We have seen in recent years; that if there is no power for one hour in a country like America or Canada, then by the evening they come up with figures about the financial losses that took place due to that one hour of no power; i.e. how many transactions did not take place, how many payments were not transferred, how many

contracts, or deals were not done etc. In that one-hour billions of dollars are lost due to one hour of no electricity. They present these figures and they are recorded if you want to see the figures of those incidents in history. Since there is no electricity in Pakistan then does that mean there is no loss? The entire foundation and infrastructure has been destroyed due to the lack of power. The Industrialization and its foundation are all ruined due to no electricity.

This filthy General in the entire history of Pakistan; General Parvez Musharraf who was the topmost insensible, and foolish person who thought that he understands everything. He himself in one of his interviews on TV said that in my government itself Pakistan was completely bankrupted at that time. He confessed this in his interview, but the global institutions and big powers who had relationship with him knew the situation of our economy but this was not announced and kept it hidden. Then we took loans and took the system forward and this was an interview of him few days back. The present Army chief has said few weeks back that the difficulty of Pakistan is not defense. They used to say before that Pakistan has threats from terrorism and its neighbors. Few days ago, he has issued this statement that our economy is completely ruined and he gave example of Soviet Union that they did not break down due to weapons but was due to the economy. Soviet Union which got divided into some nations and it was a big empire which got divided because their economy was weak. Our army General is saying that we will not be defeated by weapons instead our economy will destroy us. The economy is not getting ruined now, it was already ruined. The damage which they have done inside the country no one points towards it; neither the rulers, the politicians, the parties nor the media no one speaks on this topic of ruined economy of ours. The wrath of the destruction of economy does not come on the government, or the rulers instead it all comes down to people and breaks the back of the masses. But our Pakistani people are

not concerned about anything as long as there is a cricket match. They do not care for hunger, thirst and can tolerate everything that they are doing. This is the effect of political instability which is not expressed by our government and the media.

Pakistan losing its global identity

The ongoing terrorism has created an atmosphere of insecurity and chaos. The panic and chaos amongst people is also due to some reactions that are done by the government under the pretext of *Anti-Terrorism Operations*. One such reaction is that due to unknown reasons people are arrested and they are just made mysteriously disappeared. The government institutions, and agencies hijack people and then do not inform also where they are. If you are a government organization and if someone commits a crime, then you can inform the person about the crime, get an arrest warrant from the court; then arrest him and present him in the court; run a trial, give him time to defend and if the crime is proven then punish him, or else release him. But this is not acted upon and multiple persons are picked up in abnormal way and neither their family, or relatives nor anyone else knows about their whereabouts.

One effect of such government level actions is on the international status and personality of the nation. The personality of Pakistan has become very bad and globally Pakistan is not trusted by anyone even by close friends of Pakistan because of these acts. You have laws in the country and when there is law why do you bypass it? The law has given the rights to arrest by police, or court and a person can be arrested by law but despite of the law being present, they capture persons in such an unlawful manner. It is like a person has married legally and has a lawful wife, and then the husband comes and kidnaps his own wife from home. When you have a law, she is your wife, you can take her anywhere but if you come as

a gang and kidnap your own wife then this would be a senseless act. Such things create anxiety, and fear amongst people and a sense of insecurity. And on top of this there is the defaming of the nation and international trust is lost and already Pakistan is gradually losing its status globally, and then on top of this such activities are done. There is no doubt that those who do such things are not loyal to Pakistan.

CHAPTER 3

THE ROOTS

Terrorism and corruption are declared as two big seditions internally in Pakistan and efforts are being made to end them. The Judiciary also keeps issuing statements that the National Action Plan has become a mockery which means no results are seen. If these two elements (terrorism and corruption) can be ended, then a peaceful environment can be established in Pakistan.

Terrorism and Peace is also in accordance to this principle; like everything it also has a cause and it has an effect. In order to end terrorism or corruption you have to eradicate its root causes, but if you only try to eliminate its effects, it will not end. Terrorism will not end with operations against terrorists, it will only end if you start operations against 'terrorism'. We need to find out from where terrorism got born, and these root causes should be kept in mind. We and the entire world now believes that in Pakistan as well as anywhere else in the world, terrorism is done by religious segments. The religious segment has been brought out in the field only by exploiting their existing prejudices, sectarianism, foolishness and weaknesses; hence by ending this group also, terrorism will not end.

This evil tree is a tree which has roots, stems, branches and leaves. If the leaves fall down then we should not be happy that the tree has also fallen down. When the leaves become dry then they fall but this does not mean that the tree has also dried out. In order to fight against terrorism there is a need for a strategy, and to make the strategy, a strategic study is required which means you need a group of folks that can carry out the strategic study. When this group examines terrorism, first they will come to the point on why and from where terrorism started and for what reasons it is still ongoing? If we become aware with the causes and

reasons behind terrorism, then it is easy to fight against terrorism, otherwise if we just keep on cutting the leaves and branches; by catching groups and hanging people, terrorism will not end unless its causes are not uprooted. There are three big fundamental roots of terrorism in Pakistan which are also the causes and means of the global terrorism.

First Root – School of hatred

The first fundamental root of terrorism in Pakistan is its visionary foundation. The terrorist minded visionary people, their thoughts and like-minded ideology whose only objective is to declare Muslims are infidels and then kill them. They consider everyone who does not harmonize with them as infidel and if these visions, and thoughts keep on spreading and their scholars, mufti and madrassahs are left open, where they declare all Muslims as infidels, then there is no use of finding and killing terrorists on the street as long as these factories are still running. These people have a syllabus to teach that all Muslims who are not as per their school are infidels, and they should be killed by this group. This is *Takfirism* which is one big cause of terrorism.

This is one big element for which there is no one that has the courage in Pakistan to say; that these centers are doing this in Pakistan. To target the shrine of an elderly Sunni Saint or targeting a sect like Shiite is a special form of terrorism. Where are its roots? Is India against these shrines or the Afghanistan government? Their terrorism targets are different not these sacred places. It is clear that the roots lie in the *Takfirist's* thinking, and mindset which has been spread in Pakistan under the provincial leaderships in Pakistan. A movement of Takfirism has been started from Pakistan by which one sect considers everyone else other than themselves as infidels; like Shias are Infidels (*Kafir*). They consider shrines and

anything which other sects believe in as infidelity. If anyone from other sect prays or wears a dress of his own this is *Shirk* (polytheism) to them. These Takfirists are formally present; they have centers, mosques, and they issue verdicts of infidelity by coming openly on media. These TV anchors are also amongst them; they invite Takfirists and take verdicts of infidelity (*Kufr*) on TV channel.

Is it not clear who is issuing these verdicts of *Kufr* in Pakistan? Shias do not consider anyone else as Kafir and till date Shia has not issued a verdict of *Kufr* against any Muslim; that they are outside the religion and infidel. The Ahle Sunnah also do not consider any other sect as infidel. This Takfirist thinking, and sentiment is present in the roots of terrorism. Everyone knows this, and still they are doing operations on terrorism cells and groups, but until the time this Takfirist thinking is present, this group is present, it will not stop terrorism.

This Ideology of Takfirism which promotes terrorism and permits the killing of people as justified, needs to be targeted. This is the source and until the time you carry out an operation against them, it is not possible to control terrorism. These sources have not yet even been touched. As an example, the Takfirist Imam of Lal Masjid (in Islamabad) moves around openly, who is such a big criminal against whom the Pakistani forces carried out an operation but still he is secure. Lal Masjid is just an example but in reality, in every city, mosques of this vision of Takfirism have entered.

They know the sources but still don't go after them. Which source is promoting it? When they make a plan, they make it for everyone. From where does the smoke come? It comes from wet wood and not dry. But when we make a plan we clean up both wet and dry. This is not a solution but instead it creates more difficulties. When you know that in Islamabad

this person is the source of evil, then arrest him instead of shutting down the mobile services (*at the time when he delivers Friday Sermon*). When we know who has this thinking of terrorism, then why don't you go there? They start with *All* mosques, Imambargah's, madrassas that they should fill forms, do this, do that etc. but they don't go there where terrorism is. Instead of sealing schools of the entire country, only if Pakistan can seal certain centers, certain embassies like that of Ale Saud, Pakistan will become safe. If certain mosques in Pakistan are sealed, certain offices, organizations are sealed there will be safety in Pakistan. By removing only leaves you cannot end terrorism.

Universities – New breeding ground of terrorism in Pakistan

In early September of 2017 a new face of terrorism manifested itself in Pakistan. In the past after the Afghan war the *Madrassahs* were involved and terrorists were produced from there and everyone knows as it was done openly and for more than 20 years this act went on; and when they realized it is out of control, and their leaders themselves are getting affected; they are getting attacked by the Fitnah created by their own hands, then they tried to control, this like after the attack on Peshawar school, then they decided to finish them. Prior to this terrorism was on its peak; Shia *Hussainiahs*, religious processions (*Juloos*), and personalities were attacked regularly. Now when it came to them, they started this operation. They kept all their attention on *Madrassahs* and they knew which *Madrassahs* are involved but they went on with a search operation on *every* *Madrassah*, and now they are finding out that the dangerous Dens of terrorism are also the universities.

The operation that was done on 2nd of September 2017, on the day of *Eid Al Adha* by which a personality was attacked they found out that it was done by University students; where one was a PHD, one was an

engineering student, an M Phil, and one Doctor. They were searching for terrorists in Madrassahs and they now found that they are being bred in the universities. The universities have become dangerous dens of weapons, terrorists and this came in the newspapers that several times Punjab universities were raided and hidden weapons were found in big quantities from there. So now they are planning to end them from the universities. They are doing search operations in universities and they are seeking student files of the university students. Why did you leave these universities on their own in the first place? There were several clashes, and riots that took place in one of the university during the raids. This is the outcome of the clash of civilization, and we can see what has been done to both religious institutes and also the secular ones. Now you will see educated terrorists coming out; PHD, and MBBS terrorists will come out, in the past they used to be ignorant and illiterate. If they are educated, they will be more dangerous. Educated person will have more knowledge, his mind will work better. In this scenario also, the politics and other difficulties will come in the way and this will not get solved. They will just keep this in news that there is an immediate action required, a cleansing is required etc.

Imam Khomeini (r.a) ordered to close the university after revolution and ordered to clean it up from all the filth first. If that would not have been done, in a few months the revolution would have failed. Even now there is an argument on Imam's decision as to whether it was right for Imam to order the shutdown of the universities. Coming back to Pakistan, there are many students who went for training in Afghanistan. In newspaper there is a name of every university from where students have gone to Afghanistan for militant training. One college student presented some religious propagation (*Tableeghi*) material which was shown to me. The material that was shown was dreadful, and this has been getting published in Medical College for years and distributed, and such things are

being done in that college. Those who are reading such things, then they get educated also, where will they end up? This dreadful act in Pakistan is going on daily and on the other side they are claiming to end terrorism. I have said before also that the terrorism from Pakistan can only end when its three roots are eliminated and the first one is these visions, ideologies, and thoughts which are being cultivated from *madrasahs* and universities.

We all know which are those centers where this Takfirist ideology is present by which according to them all are Kafir and obligatory to kill any other than themselves. If this vision is not controlled and operation is not done against this vision, then terrorism will never end from Pakistan.

Second Root – Government Sponsorship

The second fundamental root cause of terrorism are the government sponsors. I have said before that terrorism did not start from and by the people of Pakistan. If it happens from ordinary people, then criminals, thieves, or robbers come out and do such misdemeanor acts, but terrorism can never be created by people of any community. The terrorists even though they mostly belong to Sunni sect but they are not created by Sunnis instead they were made under the supervision of the government. It was created at that time by all officers of the government, and military for Afghanistan, and Kashmir Jihad. They made *Sipah-e-Sahaba*, *Lashkar-e-Tayaba* and they were all state and army sponsored. Now America has stopped giving them alms and asking them to wipe off certain groups. This work has been and is being done under the state's supervision. All those criminals who have done this should be brought to justice in court and whoever and whatever position they had, whether they were president, prime minister, or an Army General and if they are outside the country still they should be brought in front of the people,

that they are the actual criminals and should be punished. They have planted this evil tree, but to this date even their names are not mentioned as criminals.

There are certain people who are present in the government institutes who have the same *Takfirist* thinking who give funds, protection and all types of support to these terrorist groups. They consider these terrorists and Takfirist groups as the assets for the nation. This thinking is present within certain bureaucrats and political personalities that these terrorists are our strategic assets, and forces which are going to give us protection from the neighboring enemy countries. This means wherever there is a need like Yemen etc. or somewhere else we should send them. The biggest pioneer, and guardian of terrorism is Saudi Arabia whose religious preaching that is spread across the world, has terrorism and killing of Muslims inside it. There are daily programs held to discuss the protection of *Haramain*. These are done openly by banned outfits, so if you have banned them than how are they doing these gatherings? You are claiming that we will not allow terrorists to raise their heads, we will not leave them but these are all verbal statements. The government has the power to fight terrorism but with a condition; that sincere, loyal persons become available in the government that are not sold out for Dirhams, Rials, Dollars and Gold. If the government does not want to end terrorism and consider them (terrorists) as assets, then the only ones left behind are the masses who can end terrorism.

Preparing terrorists in Prisons

An incident that took place in Karachi in early September of 2017 which the newspapers have mentioned in their internal pages and have not highlighted. The incident was that a few months ago two dangerous terrorists of *Lashkar e Janghvi* escaped from Karachi prison. Their

organizational nick names were *Munna* and *Firaun*. They were caught after many operations of terrorism and were inside the Central Jail of Karachi and during their imprisonment they escaped and reached Afghanistan and it is confirmed news. The investigative committee that was formed for this case has given reports which are coming out slowly one by one to people. One news that came out was how they ran away from the prison. There is one famous terrorist *Sheikh Adil* inside the Karachi prison who killed the American journalist *Daniel Pearl* was inside the prison for several years. The police officer who was in charge of him was changed, and a new officer was brought in and he was given the duty to recite daily *Zohr* prayers with Adil Sheikh; that is pray behind him in *Salaat*. This was that came in the news and this information is also very meaningful. This inspector of Jail started to pray behind the criminal. These two terrorists were placed in a very special five-star cell inside the Central Jail. All the prisoners of *Lashkar e Janghvi* were inside 'B class' Jail by which special facilities are given to them; a separate room, and servants and they are provided with TV, phones etc. and meetings are held there. These terrorists were given B Class, although in terrorism related acts no one is given B class prison facility. That is given only to educated personalities who are in Jail for some other financial crimes etc. but not to terrorists. These two persons who have escaped from the prison, as per the newspaper had 26 servants. They were two terrorists and such protocols were given to them. The newspaper published something more that is a big story about inside the prisons. The army, and rangers are carrying out operations against terrorists outside and see what is happening with them inside the prison? The Prisons are under government and police. Then another news which was published; is that in the last few weeks, in Karachi prison registrations have been done for the recruitment of about 300 personnel for ISIS. The prison where the food, custody, and control are from government, and where there are

dangerous criminals present. The more dangerous they were, the more they were given high grade protocols and as a result they got more than three hundred candidates for ISIS.

As I have said before that until the time you don't uproot them from the roots, terrorism will not end. You are just trimming off the leaves whereas the roots are still intact. The roots are the three roots of terrorism, and this incident is the best evidence for that discussion. One root was the *Vision of Takfirism* which issues verdicts of killing. This is the first root and no one touches this vision which is the most dangerous. Those who keep these thoughts, they are the most dangerous; The one who does not think like you is to be killed. The second root are the government authorities who are sponsoring terrorism and are present everywhere; in GHQ, Air force, Navy and it was discovered that everywhere they had supporters. They also have sponsors, supporters inside political parties. The third root is the Arab wealth. Until the time these three roots are not cut, there will not be any peace in Pakistan and terrorism will not end. The terrorist of *Lashkar e Janghvi* has been admitted inside, and now he has been promoted to ISIS. He has now become the commander of ISIS and then in one way or another he would be allowed to exit the prison and this is what is happening inside the country.

Politicians and Parliamentarians

In September of 2017; the Pakistan Intelligence Bureau had issued a report in which they mentioned that thirty-seven Parliamentarians belonging to the ruling party are associated with suspected terrorist groups and are supporters of terrorism. There are thirty-seven MNAs in the Pakistani Parliament who are supporters of terrorism. Some members protested on this and got the matter suppressed, and about this they said that this letter was not written by an agency. How is this possible that a

fraud is done in the name of the top most intelligence agency of the country, and then issued to the parliament too. Parliament is not like a mosque where someone can just throw a pamphlet. The intelligence agency issues many letters and you pay attention to all of them, but for this you are saying it is fraud. Now they have got this documented evidence which is saying that there are supporters of terrorism inside the government. On one side America is saying that Pakistan is supporting terrorism which they do for their own benefits. You can't say that even if this letter is proved to be fraudulent, then there is no supporter of terrorism in the government organizations.

As I mentioned before one root are those sects, schools of thought which declare every Muslim sect other than them as infidels and obligatory to kill. This thinking and sect is the biggest root of terrorism and in the battle against terrorism they are not touched at all. In fact, for the sake of getting their votes for elections all political parties, those in power and those who are not, have all remained away from them. They are in fact supporting this particular group just for the sake of getting votes. The supporters of this Takfirist groups are present in every lane of Pakistan and since these are all votes, the political parties don't touch them and in fact they are doing alliance with them. Recently a secular party has done compromise and an alliance with the father of these Takfirist thinking group and has done an election alliance from now on. That person who has been called as the father of terrorism in media. The secular group which is not even religious for the sake of votes has done political alliance. It is not just that they don't touch them, but instead they help, support and give them aid. First they gave 300 million Rupees to them as gift and now they have done alliance with them. Who says that we are confronting terrorism?

That vision according to which all Muslims are infidels; they were and are allowed to spread, propagate and there is no control on them. They come openly on media and declare by name Shias and other schools of thoughts that they are all infidels and its obligatory to kill them. Now all these terrorists thinking groups who consider 'Muslim killing' as obligatory; they had a meeting at a government level with the highest protocol as a preparation for getting votes in election. The Takfirist institutes promoting terrorism are given aids by government that too in a situation when there is a high security alert. They give them big amounts to install computers and bring them in mainstream politics. They want these terrorists to become ministers and sit in the Assembly which they have done in Jhang. This is the accursed dirty politics which they are playing that in order to make someone leave terrorism, they bring him in assembly. By coming in assembly will he not remain a terrorist? In fact, he will be a much powerful terrorist now. This is filthy politics and this way terrorism will never end in Pakistan and anywhere else.

The second root is this government guardianship and support which the terrorists get. The Pakistan's secret agencies somehow have issued the names of thirty-seven members of the national assembly, who are members of the Parliament as supporters of terrorism. Since they were members of Parliament their names were declared but these are not confined to only thirty seven. In every government organization their supporters, guardians are present who provide them support in a highly effective manner and till the time this guardianship, support from the government does not end, this terrorism will not end.

Killing Shias is not Terrorism

These terrorists are the tree of devil which was planted by Zia ul Haqq in Pakistan (in next section we will discuss more about this). May Allah curse him and all his companions who have supported him in this work. That accursed person planted this and others came and watered it. The leading prominent terrorists who get killed in Anti-Terrorist operations by our security forces have attacked and killed people from all sects. This operation which has been carried out is just to make the leaves fall, and that too when they kill some terrorists the state sponsors present inside the government do not even say that these terrorists were killed because they had been assassinating Shias. A case should have taken place in some court, and they should have been hanged after the case, then it would have been for the sake of killing Shias. But no one in Pakistan desires that a single terrorist or an individual is killed just because of his crime of killing Shias. This is something that should happen by which if you want to punish them, then punish them by announcing that they were punished for killing Shias. They should be punished for their crime of killing Shias but they would never do that as they are the sponsors of terrorism themselves.

They do not consider any attack specifically done on some Shia center as terrorism unless the attack is done on any government institution, university or school. If a Shia Hussainiah, rally, personality, Friday prayers, or mosque is attacked they do not count that as terrorism. This is an improper thinking of media and some other people, as these are all acts of terrorism whether a school is attacked in Peshawar or a mosque in Peshawar, they are all terrorism and of the same type. Even to this date there are guardians of Taliban and such groups, present within the government.

The situation in Pakistan is dangerous and all these who are watering terrorism are all criminals and operations should be done against all of them. Pakistan has a threat from all of these. On one hand there is India, Israel and America as enemies of Pakistan, and internally these are the more dangerous enemy who are weakening Pakistan from inside.

Third Root – Arab and Foreign elements

Ale Saud – The mother of terrorism

Amongst these three roots one big element are the Arab nations who in a well-established way are spreading terrorism globally and behind them are Western nations. The Western nations do the real Satanism, and Arab nations due to their love of power, and ignorance are indulged into this aggression and crime, and then some other nations and religious groups who are spreading terrorism across the globe. The top of the list in them is *Ale Saud* who only do terrorism and nothing else. They spend their oil wealth to finance terrorism. To kill Muslims is their objective and agenda. They have taken various other steps like they have made this force of 34 nations to kill Shias. This is just an illusion, and this force will never get made but there is a dirty, filthy mentality and thinking behind it. With this illusion we can guess what is present inside their minds. What kind of plans they have about other Muslims and specifically about Shiite. This is a proven thing that this illusion of theirs will never become practical, i.e. they will make a big force with so many nations under the command of a Pakistani and then they will start the bloodshed. Although this has happened before in Palestine, by which the accursed General Zia ul Haqq who laid the foundations of terrorism in Pakistan killed Palestinians and it was the biggest massacre of Palestinians done in the history in their camps.

Zia ul Haqq went to Jordan and from there he attacked Palestinian camps and the well-known massacre of *Sabera* and *Shatila* where thousands were massacred in a day. The commander of this tyrant group was Zia ul Haqq and this disgrace is still present for Pakistanis that they were involved in this massacre. If Zia ul Haqq has done this, then once again this can be done. They are doing it in Yemen, Iraq and Bahrain and now they can be further enhanced. Now they have this plan to rent forces from different nations to do mass killings of Muslims. As I said these are just dreams and illusions because Allah has not handed over his system in their hands. It is Allah's intentions on the world and it is Allah' promise and Allah has made such forces who know how to keep these tyrants within their limits. But this shows their negative, filthy thinking to kill Shias, which they have done in Bahrain by finding some excuses to kill Shia. They are filing cases on Shias and then later they will send a battalion under some Pakistani commander to kill all the Shias in one day. These are their evil intentions and believers should be aware about them and not remain negligent. In this order various activities are going on, amongst which one of them is that *Imam e Kaaba* comes from Saudi at regular intervals to do recruiting of people from here by taking on the sentiments of people and by taking false advantage of the *Haramain* there. They are hiring killers to do massacres in Iraq, Lebanon, and Syria and whenever these people visit Pakistan a new wave of insecurity starts here. They take people from here to carry out their evil intentions. This is one element of terrorism in Pakistan by which the Arab nations spend money to promote, and recruit terrorism in Pakistan. It is proven that the Arab nations have never spent money for the development of Pakistan, they only spend on such evil activities.

They spend money, and every other day our rulers on one phone call visit Saudi Arabia. A phone call comes and within thirty minutes they are there in Saudi Arabia and then give statements that we are ready to sacrifice

our lives for Saudi Arabia. Why are you ready to sacrifice your lives and Pakistan's for Saudi which is a big Fitnah who is taking lives of innocent Muslims? Why should Pakistan sacrifice itself and its peace for them? This is because this Arab wealth is buying out Pakistanis and this wealth is very effective on us. All these three roots are well known to everyone. Every child knows in Pakistan that these are the three foundations of terrorism. If these three get uprooted, and the day steps are taken to stop the inflow of Arab wealth, to block government sponsorships and ban the issuing of verdicts from Takfirist then we can say that real operations have started in Pakistan against terrorism. But if these three are not touched and instead strengthened then no one should remain in this good impression that terrorism will end in Pakistan. This will remain and only at times breaks will come and then again, they will gain severity.

If you want to eradicate Terrorism then you have to control its roots. At present all those countries who are hosts of terrorism are friends of Pakistan. Ale Saud is the mother of terrorism which has given birth to terrorism across the world. The entire world has seen and confessed that they have done all this; it was done by their wealth; they promoted terrorism and specifically in Pakistan. Turkey is that country which has disconnected from Islamic world and had become secular, has now become the *Imam* of terrorism and is the close friend of Pakistan. The peak of terrorism was seen in ISIS which was strengthened by Turkey, although others like Qatar, Emirates, Saudi Arabia and Bahrain are the front-line groups supporting ISIS. They (turkey) provided human resources, provided weapons, vehicles in big numbers and special vehicles made on order were provided to them. They have been supplied with modern weapons and to strengthen them they robbed petroleum from Iraq and Syria. ISIS in return smuggled this oil to Turkey and Turkey has been selling this smuggled Oil to other markets. Turkey and Erdogan is involved in this black business and they are all friends of Pakistan.

Emirates, Bahrain, Qatar are all close friends of Pakistan and they do whatever they want to do in Pakistan.

Silence of Pakistani rulers against Foreign elements

Thus the uncontrolled interference of Arab nations in Pakistan is the biggest element of promoting terrorism in this country. All the religious elements whichever name they may be i.e. Taliban, Sipah e Sahaba, Lashkar e Jhangvi or other small breakout groups they are all fully supported by the Arab nations. But Pakistan cannot say or has the courage; not with media, army or any personality to tell Arab nations to not support terrorism in Pakistan, and they can do whatever they want to do in their own country but leave Pakistan for its people to manage. It is impossible that Pakistan stands up and says something to any Arab and Arabs do not even consider or treat Pakistanis as human beings. Those Pakistanis who are working in Arab countries can provide you the details on how they treat us. But just for the sake of poverty, labor and to make a living they work for these lowly beings and these Arabs molest our women, even kill our birds, and animals and whatever they do we cannot tell them to stop. They cannot even summon the Arab ambassador and tell him to not take hired people from here for fighting in Yemen, and Syria or any other front. Pakistanis are not the nation who can be hired, although due to poverty the people from here visit Gulf countries for work, but please do not make them rented killers and use them for terrorism. If you Arabs have money then spend it for the development of your own country and do not even give charity to us. Though we are seemingly poor but we are independent and this nation has a lot of potentials and we are capable to save our own nation and develop it. This feeling of slavery and shamefulness due to the money that comes from Arabs will never allow terrorism to be eliminated from its roots in Pakistan.

It is a common political trend that those countries who are involved in a war as an alliance, the diplomacy goes on its peak. Saudi Arabia started the war with Yemen using Pakistani forces but at ambassador level there were no actions taken. The only diplomatic act which was done was when their minister of religious affairs, the *Imam of Kaaba* visited. They should have sent the foreign minister, the defense minister etc. but instead they sent Imam E Kaaba who did not visit any other country but came to Pakistan. You are aware that in Pakistan their Foreign minister or defense minister would be of no use.

The Imam e Kaaba visited various mosques and delivered sermons and the Pakistani Parliament openly announced that the opinion of Pakistan's Parliament and that of Pakistan's people differ regarding Saudi Arabia. The community is with Saudi Arabia and the parliament wants to remain indifferent and unconcerned on the war with Yemen. It is evident that the purpose for which he came was because they had formally asked for the Pakistani army which was not provided by the Parliament for whatever reasons. But now they have come to ask for the actual force which was developed in Pakistan with Saudi money, which is the *Takfiri* force. He went to various areas and spoke lies in many places amongst which he said, that these Houthi Shias want to attack Holy Kaaba. It should be clear to everyone that this person is the Imam of Kaaba, he leads prayers and one of the essential criteria of leading prayers is to be just, and this person is openly talking lies.

Today the motives of Yemenis are clear in front of everyone; the intention of Saudis and others are also clear, and not even a single time and not even by any ordinary Yemeni this has been said, instead the Yemeni leadership has said clearly that we respect the Holy Kaaba more than Saudis. We are also Muslims and this is an established fact that the Holy Kaaba is under the siege of Aale Saud and protecting Kaaba is the

responsibility of every Muslim. Where have the Yemenis said anything like this; that they have intentions to attack Kaaba? At least bring some evidence on where they have said this? A press conference, some clip, some news report to show that they have said this somewhere. This is a blatant lie which the Imam of Kaaba is speaking. Aale Saud has attacked Yemen and caused big destruction there and now you are saying that the Mecca and Medina are under threat? This Imam of Kaaba has forgotten his status, what position he belongs to and speaking lies. But no one challenged his statement and not even a journalist questioned him. This has been a dangerous trip of his. If he maintains the dignity of his position as the Imam of Kaaba than he is respectful, but if he comes here to speak lies, accuse Yemen of false statements, to distribute wealth over here to gather Takfiri forces and the civil force of terrorists which Saudis have made, then it is a disgraceful act.

You must have seen the newspapers yesterday where most of them have an advert saying, "Required for Saudi urgently"; it is not mentioned who and for what the requirement is for? Just an advert is there, that they need urgently for Saudi Arabia with telephone number given to contact to go to Saudi Arabia.

We need to be alert about all these things, when enemies have made such a brutal force of ISIS, and after the defeat of ISIS in Syria and Iraq; they are creating seditions everywhere. In early 2015 one international NGO had a meeting in Islamabad and they have published a report about Pakistan. They have said that maximum killings of Shia have taken place in this year and they have given the cause also, that it is due to the Saudi interference in Pakistan. The Pakistani leaders have gone to Saudis and begged forgiveness from them for not providing Pakistani army formally to them to fight against Yemen, but also promised that they will provide a much

better civil force to them, and they are prepared to support them at any level. And as a result they have sent their ambassador to gather this force.

Another friend of Pakistan is America, and we have seen before when Obama has said that Pakistan will remain insecure for a few decades which means that they have made plans to keep Pakistan insecure for decades. This week their president said that Pakistan has dens of Terrorism, and on the Independence Day of India, Obama said America is with India and Pakistan should reply on *Pathankot* issue. After doing so much, now they are asking Pakistan to “Do more”. If you want to end terrorism, first you should break relationship, and friendship with these countries. People should demand that these are the roots of terrorism. They are selling, promoting terrorism across the world and in Pakistan they have become friends. Until the time the Emirates, Ale Saud, Turkey, or Qatar are our friends Pakistan will never become secure and safe. This is the outcome of the path which we have adopted. If you want to eradicate terrorism then you have to eliminate the root of terrorism; which entire nation should do. In Pakistan there is a lot of support present for terrorism.

When the Imam of Lal masjid comes on media, he is interviewed and discussed, and then you say we will take it seriously i.e. anyone who supports terrorism, then why are you allowing such person who does not consider terrorist as a terrorist. He is the person who says the soldiers died fighting against terrorists should not be considered as martyrs. Since the last few weeks all mobile services are closed sporadically in Islamabad, why? because this person wants to give sermons on Mobile phones. They do not stop him, they do not catch him but mobile services are shut down for a few hours. What is this policy and fight against terrorism? Why are you afraid of him? Why don't you file a case against him? Instead he was released from all cases. This means there is some power behind him,

which has made you helpless. You can stop mobile services but cannot catch a Maulana. Similarly, you have closed all education centers, have you analyzed the losses incurred due to closing schools for one day?

The Imam of Lal Masjid cannot be controlled because he is supported by Ale Saud who are friends of Pakistan. Saudis, Turkey, Emirates, Qatar, and Bahrain are all friends of Pakistan and those who have such friends that country does not need any enemy. This is the gift of friends which is showing its effect.

There is only one way of controlling terrorism which is by blocking its sources. One of the three main sources are the foreign nations. We turn the face of every terrorist act towards India and there is no doubt that India is doing this because they have explicitly said that they will do this. But involvement of India in these activities does not mean that Arab nations should be masked. Even if India is getting this done then it is also doing this through the networks made by Arabs. If you see the pattern of their attacks they are all done on a specific group and target. Though the India's financial and other support is there, but there is also a clear Ideological element in these attacks. Why the attacks are not taking place on the sacred places, mosques and shrines of every sect and school of thought in Pakistan? For India it makes no difference how many sects are in Pakistan; it should happen on every sect. But when the targets are specific then it means even when they are doing it, they are also using this network only. Terrorism cannot be controlled unless these three sources are controlled. An operation is required which is against these three sources.

Recruiting Terrorism in Pakistan

The Arab princes come to Pakistan and do hunting of animals, people, posts and they target big things. Their way of hunting is that they have already eradicated rare species of animals of Pakistan with hunting. The wild unique mountain goat in Balochistan has been completely eliminated from Pakistan. Now their way of hunting is that the Pakistanis get some animals like deer from a zoo and make it run in the forest, which is then targeted by these princes. In Muzaffargarh they did a lot of aggression and in return they donated a hospital. In Bhakkar also they did the same. For Pakistanis they are happy with it. Apart from this they are targeting retired Army Generals. They did this and have selected a Pakistani General for the 34 countries 'dream force'. This was severely opposed by many groups in Pakistan that this should not have been done. The glitter of Dollars, Rials should not blind our eyes. This son of Salman is making this force for whom? This force that is being made we know it is not against Israel, because now Israel is a friend of Saudis. It is against Shiite and Shia groups, and in this evil axis to bring Pakistan at the forefront and defaming Pakistan is not worth it for Pakistan. It is shameful that anyone in the world who wants to do an evil act, they rent Pakistani people. Pakistan is a respected, dignified nation and we should regain our prestige and live a respected life. As far as security, and safety is concerned the signs that have been seen before too, and one of the signs is that after breaks a new wave of terrorism starts with much more severity and that too starts with Shiite. In the last few days that have passed, certain leaders of Bahrain, Qatar and Saudi have visited Pakistan. These people come here for hunting; sometimes for animals but also for men, politicians, party and all types of people. Second reason they come here is to recruit for terrorism. The terrorism that is done in Bahrain is mainly done by recruits from Pakistan, ex-army personnel are recruited for

Bahrain and then they carry out this aggression in Bahrain. Similarly, Qatar which is in the forefront for every Fitnah, specifically in creating ISIS and terrorism. Qatar is now competing with Ale Saud in these evils and they claim that we have done big investments and are superior than Ale Saud. These three countries keep on continuously visiting Pakistan and their presence here is a bad omen for Pakistan. Whenever they turn towards Pakistan and the statements they issue, it means they have come to organize the groups from here, aid them, recruit them and take them to their battle fronts like Yemen, Syria and Iraq.

Pakistan disgraced in Arab Conference

In the Arab conference that took place in May 2017 in Riyadh which was led by Trump, Pakistan also attended it. It was a strange incident by which the Pakistani rulers have offered everything to these Arabs at their disposal, but what happened there was astonishing. Pakistan likes to step on every banana peel to slip on the road. These insane rulers of Pakistan wherever they see something to fall, they fall down. Other nations try to protect themselves, they try to destroy their nation themselves. The other nations try to grow, they want to decline. Other nations bring foreign investment, but Pakistan rulers sell their own nation. See what Pakistan got in this conference, the Pakistani rulers went to attend this conference, but see that no one from Saudi state came to receive them at the airport; the Pakistani ambassador came to receive them and take them to the royal family. There is a discussion going on in Pakistani media that the Pakistani Prime Minister was not allowed to deliver a speech, he was not given a warm welcome and a picture was also not taken. He had no picture with Trump, King Salman, nor with the wife of Trump or his daughter; may be one picture with governor of Riyadh. The media also has ignored them, and they have not even shown them anywhere. The media is now quoting that forty other countries were also there and they did not

Speak, so what's the big deal if our PM did not get a chance to speak? This is like if there is a rich person who has a loafer son and who becomes the owner of everything. Now when this happens all other goons, and rowdies in the area become friends with him to milk him as much as possible. All the nations who went there they were in a hope to milk this cow. But see whom did this cow give what? The entire milk was taken away by Trump so what did Pakistan get? Why should they take your picture? They do not treat you as a leader, they consider you as a paid employee. They have done only this only until now. They have been paying you for the services you have been providing. They have kept you on rent and those who are kept as employees are not counted as guests. They do not allow such workers to sit with high level guests, take pictures and deliver speeches. This was your worth. The cow gives other things also; it gives milk as well as cow dung. This cow of Trump, the Arabic cow has made Pakistan dirty with its cow dung. They gave this waste to media, and rulers and have them do whatever they wanted them to do. Now you were present and listened to the speech of Trump; that Iran has to be isolated. You have listened to the insane King Salman's speech that Iran is an enemy. Still you are saying that this was an Islamic gathering of unity? Against whom?

Anyone who takes help from foreign nations in the name of religion, whether Shia or Sunni and creates discord in his country, does treachery with his country. That money is wastes, and dung and it is not any support. The foreign money which makes Pakistan weak and sectarianism is created in Pakistan, the foreign money which creates groups in Pakistan is not 'support' it is a filthy manure like waste, irrespective of who gives. This is what you have got, the waste from that cow.

This was a foolish step of Arabs and the West. You can see all the big names in Pakistan, who are supporters, boosters of them have all become dead silent. What face will you show to the world? You went into the

leadership of a Kafir and sat there and passed a resolution against an Islamic country, against a Muslim nation, against Shiite; now what face will you show in front of the community. This is a foolishness of enemy, whereas this is deception from Allah. On one side there is a stratagem of Satan and on other hand there is Allah's ploy against Satan. Even if Shia would have put all their strength they would not have been able to disgrace them the way they have disgraced themselves with their own wealth, with this filthy conference. Could Shia have proved that these Muslim nations are followers and an army of enemies? No one would have believed this if this would have come from Shias and everyone would have said that this is prejudice. Today their rulers openly in front of the world, and media presented themselves that who we are? Who can hide this? This is Allah's ploy that they got disgraced by their own hands.

One more thing which they did was; Imam Khomeini (r.a) presented a path to the Muslim nations; that they should separate their paths from the rulers of Islamic states who are slaves of the West. After this conference the path of Muslim nations have been separated from their rulers. The Muslim nations are never ready to have friendship with Israel, they are not ready for fights amongst Muslim nations; they are not prepared for Shia-Sunni war. These seditionists are the ones who under the leadership of *Kufr*, and fire of hell want to do all of this. Where are these Muftis now? Why can't they remember the verses of Quran? Why can't they remember the Hadith now? Why can't they remember the Islamic laws now? Such a big crime they committed openly and these filth eating *Muftis* are sitting silently. This scene is not like that media keeps on confusing the people, and Trump comes and fools the people. In the past America used to make Muslims a donkey, but a donkey is of no use, but they are now making a cow out of them who can be milked. It is not only that the Arab nations are cows instead all Muslims nations are. They are cows in terms of foolishness as well as giving benefits to others. This

herder of Muslims, this cowboy (Trump) came and made agreements; made the future of American nation for the next twenty years. If I get an opportunity another time, I will explain how in one night he solved the problem of the whole American economy. Obama in his entire tenure could not solve it, but he immediately after coming in power few months as a President did this. Everyone was thinking he was a stupid, foolish person but this fool in one day took the American economy on its peak and what he did with this cow. He gave this clear message that he believes in religion; respects Judaism and Christianity but not Islam.

He has said this in his campaigns, Presidential addresses and now in this conference openly that there is no sanctity for Muslims. Even now if the Muslims do not awaken, these leaders, scholars if they still do not understand, they will also become disgraced in every country. At present this filthy prince in Saudi Arabia is ready to spread sedition in every country. Especially the countries where Shias are present, but no Shia governance, even there the pressure on Shias is increasing. This is Saudi policy that Shias should be eliminated in Bahrain; in Saudia they are cleansing the Shia towns of Shia; Emirates have removed all Shias one by one; similarly, in other nations also where Shias are in majority, there are blasts, and explosions. They want to pressurize Shias in all possible ways; by attacking them, putting cases on them, besieging them. In the upcoming days the pressure on Shias will increase everywhere on the instructions of Saudis, the way they have done in Nigeria. But this is the plan of Satan and they are not aware of the plans of Allah. Allah says that when they do their deception, Allah traps them in their own stratagems and destroys them. Now the signs are clear that this royal family will be destroyed after this conference which they arranged under the leadership of Trump. We also pray that May Allah very soon give to all Muslim nations the freedom from these accursed beings.

Insecure country borders

The roots of terrorism in Pakistan are deep and not only on the surface. Some are inside and some outside and they are both well-coordinated. There is no one that has the courage to find the root elements inside nor outside. At present the situation, the current wave of terrorism can be understood as to why it is happening? This is because all the borders of Pakistan are insecure. There is a long border of Pakistan with India, and then there is another border with Afghanistan that is also insecure and similarly all borders are insecure. There are four neighbors of Pakistan amongst whom only with one (which is a small border window) i.e. China are relatively better relationships. The other three countries as neighbors are not friendly relationships. With India we know the reason is there from the very beginning, and the topmost reason is the issue of Kashmir which results into permanent difference between the two. But Afghanistan at one time was considered as a province of Pakistan. In order to expand the land of Pakistan, Zia ul Haq fought the battle of America, and involved Pakistan into the battle and from that day Pakistan has not seen a single day of peace. Today all steps are taken against terrorism, operations are done, meetings are done but this fact is ignored as to who are the actual roots and elements of terrorism. Those Mujahid of that time in the war of Afghanistan, have become the terrorists of today and have fueled the entire country in threat. The capital which Pakistan had invested in Afghanistan, i.e. politically, economically, culturally, spiritually, ethically, and in every other sense, instead of getting Afghanistan into Pakistan they drowned the whole Pakistan into the quagmire of Afghanistan. This was done by those ignorant foolish persons, whose policies implemented at that time have not even changed even by a bit till date, which has caused all these destructions in Pakistan today.

One border is with Iran which has always been peaceful with Pakistan. But Pakistan with its people, government, politicians, personalities and groups have always been under the dominance of Arab nations continuously. The Arabs are themselves slave and laborers of Western nations and we are the slaves of Arabs. The Arabs consider and even declare it openly in media as well, that “everything in Pakistan belongs to us” and our personnel also say that to defend the Arabs is a communal obligation on Pakistani nation. This is not something that is hidden about the relationship which Pakistan has with Arabs, in every context whether cultural, political or anything else. We can even say rightly that Pakistan politicians are more faithful, loyal to Arabs than to the Pakistani people. This is the effect of that money which Arabs have invested in Pakistan but not in the development of anything in Pakistan. They have used their wealth to buy out Pakistani groups, personalities, governments, and media and since they have money they make everyone as contractors and get work done on rent. It is a disgraceful thing that even a lowly, degraded government like Bahrain has deep effectiveness on Pakistan. Today Pakistanis consider Bahrain as a big investor, whereas Bahraini government has done mass scale oppression on their people, and scholars only because they are Shias, but our people have very good friendly relationship with Bahrain. Similarly, other Arab states also have such relationship with Pakistan and the effect of these relationships is that the Iranian border of Pakistan has also been made insecure. Though Pakistan and Iran were historic friends but now we don't see any friendly relationship with Iran. When Pakistan came into existence it was Iran which accepted it first formally and when Islamic Revolution came in Iran it was formally accepted first by Pakistan. Such deep friendly relationship has turned unfriendly although I am being careful to not say enmity, and we pray that it should not be enmity between the two but we don't sense any friendship between the two either.

In such circumstances where a country is surrounded by enemy and non-friendly neighbors, and all this is because of no diplomacy adopted. For such a long period there is no Ministry of Foreign affairs in Pakistani government and the nation is running only with a Home Minister. In such a situation the Ministry of foreign affairs plays a role to establish diplomatic relationship with other countries, but without such an entity how will a country run?

At present India and Afghanistan in the neighborhood of Pakistan are a much bigger threat and problem. The elements of enemies from Indian agencies have infiltrated inside Afghanistan and they carry out terrorist activities inside Pakistan from there. Even if we assume that the relationship with neighboring countries becomes good, still the root causes, the elements of terrorism are much more and bigger which will not allow this to end.

Confession of Foreign intervention

In September of 2017; after four years of gap, Pakistan got its Foreign Minister and due to this gap, they spoiled the relationship with the entire world. When there is no Foreign Minister and no diplomatic engagements then this is what happens. Now they have made a Foreign Minister and he visited a conference in America and delivered a very important speech. This was the first time that some Pakistani has given such kind of bold speech in America. America has told them that you have two terrorist groups in your country; one is the *Haqqani* network of Afghanistan and second is the *Jamaat-ud-Dawah* which is doing activities in Pakistan. They wanted to suspend these groups, which Pakistan did, but America wants them to block their activities completely. Pakistan is saying we have done this but America and their allies are not getting satisfied with this, and

India has raised this specifically that there is no sincerity in Pakistan's statement.

This Foreign Minister said that these groups are present, unlike other Pakistani diplomats who always have denied. But as per his statement they are liabilities on us and we need some time to end them. Liability is that debt which is on someone and needs to be paid back. This means they are that burden on us which we want to end but we need time. The second thing he said was that this burden has not been created by Pakistan, and this filth is from America who has put it on us. It was astonishing that how openly he has spoken but this means that those who have been doing their slavery can also speak if they want. On what basis he has spoken so bravely is not clear; whether it was to create an impression inside the country, or there is something else planned for outside that will be clear later. This political statement could be due to internal difficulties their party is facing inside the country or it could be due to some American pressure. But in any case, it was a very bold statement although the Pakistan media did not give it much coverage. He openly said that the biggest mistake of Pakistan, their biggest crime, biggest sin of Pakistan was the friendship and alliance with America. Then he pointed out one by one as to what America has done with Pakistan. He said that you have used Pakistan for war against Russia and put all these liabilities on us and now sitting outside you want us to end them? You made them and now you should end them yourself. The same minister said before that we have to do our internal cleansing and then we can talk about outside. This is something which the Foreign Minister said and we hope that there is sincerity in his talks and this becomes their policy, and they move on this path only i.e. addressing America in the same tone; get the nation also onboard with them and this is the right path by which we should get salvation from America. First it was the issue of aid from America, when America stopped it then it became the issue of American

trust on us, and now beyond this is the freedom from America. This should be the slogan of everyone; the government, the army, the nation and every Pakistani. We want to end the interference of America in our country completely.

In December of 2017, in Peshawar a painful incident of terrorism has taken place at the Peshawar university, where multiple people have lost their lives despite of government claims that terrorism has been uprooted completely, but still there are incidents of terrorism taking place without any breaks in Quetta, Deira Ismael Khan, Karachi and other places. The causes, reasons were explained in this section; that the confrontation that has been going on against terrorism is only to the extent of shaking this tree, the branches where only leaves are falling but the roots are in their place. The leaves fall down and then again come up. It is not enough to only shed the leaves. These three roots of terrorism, whose open evidences are present and the Pakistani community are witnessing them openly.

Who planted the seed of Terrorism? Religious or Seculars?

The first point which I would like to mention here is; that terrorism has become famous in Pakistan in the name of religion, and religious elements are more displayed and associated with it. This implies that a religious group is involved in terrorism and they are the ones carrying out terrorism, but in reality, religious groups are not involved in terrorism as the first or the primary cause. The activator and initiator of terrorism in Pakistan is not religion, irrespective of any sect. Although there is prejudice, sectarianism, and differences among religious schools have been present historically which were and are present in other places also. There are differences between Shias and Sunnis; then amongst Sunnis there are differences, and then within Shias there are groups being

formed which is the nature and defiance of the religion. You can never end sectarianism from religion and schools of thoughts, and until the time there is sectarianism there will be small conflicts but it will never turn into terrorism, sectarianism which has been historically present but has never turned into such crisis. In history whenever such level of crisis has taken place, it is the non-religious segment which has used religion and has fueled differences in religious sects; and has blown it up to extremism.

I will just mention a quick point over here and later talk about more details. Secular is a theory which considers intervention of religion into social affairs as prohibited and according to Secular thoughts even if a person wants to keep religion, it should be limited to as a personal and individual affair. If he wants to pray then he can, recite Quran then he can recite Quran but these prayers, and Quran should not be practiced in the social affairs like social living, education, finance and politics etc. He cannot make any religious thing as a value for any social affair. He cannot make relationship, do business, or make social policies, taking steps in the name of religion is prohibited. People with such thinking are known as Secular which means religion should be completely eliminated from social life and should be left as an individual affair and it is a man's choice to have a relationship with religion or not, at an individual level. You cannot make a religious education system, your politics cannot be religious and no organization can run on religious grounds. This is secularism and if you want to know more about it then you can refer to our book "*Islam and Secularism*". Secular people are not infidels or non-religious; they do not deny religious laws but they do not consider them to be a part of the social fabric, instead they prohibit the intervention of religion in any social affair. In the entire world and specifically in Pakistan those who laid the foundation of terrorism are secular people. They used religion to achieve this objective, because religious people demonstrated ignorance and negligence which has been always been a weakness of theirs, and it was capitalized and exploited by the Secular. In Pakistan the planning for terrorism was done by non-religious people and to date the non-religious people are managing this.

I have given this example also that ISIS is the peak of religious appetite. Who made this group of ISIS? It was made by Turkey which is a secular country in which a woman cannot wear Hijab to go to school, work or market. This present government has relaxed these restrictions a little. Turkey which is a secular state gives birth to a passionate religious terrorist organization with ultimate extremism. This is because the planning of Secular group is very vast, whereas religious people always have narrow vision. A religious person for the sake of personal interest looks at religion in a very narrow place also. A battle between two religious persons is that this place in the mosque is mine for prayers. But a secular does not fight for a praying place inside the mosque, instead they fight for the full mosque and the region. Religious people are narrow minded and Secular have taken advantage of this narrow mindedness i.e. the weakness of the religious people. The interests of Secular are more whereas the interests and objectives of religious people are very small. A religious person desires to have a seat in elections; they want to use religion in politics and other places in order to secure very small gains. This is because his vision is narrow and he does not demand to become the President of a country instead just wants a very small post in the government.

A religious person agrees to a small interest, and this weakness is known to seculars who have big interests; hence those with big interests make these people with small interests as their servants. You would have seen in the farms that those who are farmers are poor people, whereas the land is owned by some feudal lord. The interest and objective of this farmer is to earn bread of one time, but the feudal lord wants to own the entire land and area. This self-interested feudal lord with higher level of interests makes this farmer who has small personal interest as his slave and in return gives him bread for his family. This is because by fulfilling your small interest big interests of mine are fulfilled. You take few pieces of bread from me and in return you are giving tons of crops. You can see the difference in the vision of both of these. One who is taking advantage has a different vision and the one from whom benefits are being reaped has another vision. The same equilibrium is present in terrorism also, by

which the Secular group has high level of interests in Pakistan. You can see these big scholars who attach themselves with any party that comes in power. For this big scholar a poet has written a parody; that you should also keep your connection with the President. This scholar and his religious party who take small benefits from the state, but big objectives are achieved through them by the secular groups.

Zia ul Haqq – Host of Terrorism in Pakistan

This evil tree was planted almost thirty years ago by Zia ul Haqq and the group with him. Certain institutes in stupidity made the Afghan war as its basis and created three forces; one to fight in Afghanistan, other with Shias inside Pakistan and one in Kashmir. They were taught internal and external Jihad and these groups were trained.

The religious segment was not made terrorists on the basis of sectarianism of religious differences, instead they were used for meeting political needs. Zia-ul-Haqq made them terrorists and his entire team was not religious and they all were after political motives and power. Zia-ul-Haqq took government by force in his hands from Zulfikar Ali Bhutto and he wanted to possess some weapon by which his position can strengthen. He took the support of religious people but behind their back were not religious people. The way Pakistanis are made agents but on the back, are not Pakistanis who are making them agents; similarly, the religious segment was made terrorists so that political motives can be met.

In order to fight against terrorism, you should first open the records of the last thirty years in which these terrorist organizations were made, whose people are now being arrested and these parties are now getting sanctioned; you have to start from the beginning and see who made these terrorist organizations and setups? What was the need to make them? All those who made them some of them are still alive and they should be put

on trial. In 1945, the second world war was started by Hitler and his companions which caused a lot of damage to the world; but even to this date there are international tribunals set up to find and punish all those who were involved in that War along with Hitler. In the last few days they arrested a ninety-year-old person who was a companion to Hitler; he was brought to court and trial started against him as to why you caused such destruction. In Pakistan, had there been any arrest of any single person? who has made these organizations, gave them opportunity to grow, supported them, brewed them, gave them means, armed up or guided them?

Even if you arrest all the terrorists and along with them others also, still for the sake of balance terrorism will not end in Pakistan. Pakistan will remain in this calamity but if you are serious to end this, then start from their creators, the fathers and mothers. They were not religious people; they were secular people who for their political interests pushed the religious segment into this terrorism. Americans wanted to win the battle in Afghanistan against Russia; they took advantages from *Madrasahs* by taking religious people from there to fight in Afghanistan. Was this a religious battle? Was America religious? It was a political war, and for personal political interests, religious people were made to fight this war. This religious segment was made to fight and today they are the ones who are made responsible for terrorism in Pakistan. It is true they are responsible; and they are responsible, whom you have created yourselves and you should arrest them without discriminating '*good and bad*' (Taliban), and also without the tit-for-tat balance policy, by which the ones who are oppressed are also disturbed along with the oppressors.

The second thing to be done is that all those who made these terrorists, their names should be listed and bring all of them to justice. There is an investigative organization that is targeting big personalities and today it

was in the news that they have issued warrants against the ex-Prime Minister Gilani. Anyone who is in any position, whether the President, the Prime Minister, or a General, if he has done treachery with the nation and people, he should be brought to the court and trial should be run against him. And first one to be brought to the court should be those who have nurtured terrorists, those who have declared Taliban as their sons, those who have said Taliban are our brothers, and they are all responsible and they should be put on trial and if they are trialed then they will reveal the facts also about whom they made and where they made; they will reveal everything. If you ignore this group who has nurtured terrorists then you cannot end terrorism. It should be noted that terrorists are not responsible for terrorism, they are just pawns, they are hired killers, they are criminals who do this for their personal interests and majority of them are not even religious.

Terrorism is the outcome of the acts of those who for their political interests have pushed Pakistan into this hell fire. The first step should be taken against them, they should be brought and presented in front of the media and asked them to clarify why they did this? Some of them have confessed on media that we made these forces because it was the need of that time. For the need of the time you did such a big cruelty on your own nation and your own people? The only crime was that they were Shias and for killing them you created such barbarous groups. If you see behind ISIS, there are ninety countries but none of them are Islamic nations. They are all secular, irreligious, kings, kingdoms, Arab princes, European agencies who have trained them and foremost behind them is Turkey; then there is France, Britain, America who are behind them. A simple fact which is even known to animals is that; when you hurl a stone at a dog; the dog does not bite the stone, it runs after the one who has hurled the stone. It has this much sense that the originator of this terrorism is not this stone but the one who has hurled the stone. The ones who have burnt this fire in

Pakistan are inside and outside. Their names should be made public and everyone should know them, else this group of terrorists even if they are killed are nothing but their workers and agents, whose annihilation should not give us hope that terrorism will end in this nation. This is because the hosts of this corruption are still untouched.

We are fighting against terrorists but not against terrorism. Even if terrorists are killed or they run away, but if terrorism still remains then again, a new seed will be planted and this crop will grow again. If you want to eliminate this forever, then you should fight against terrorism. For encountering terrorism, you should first find out who started terrorism in Pakistan? The religious people were made terrorists through special *Madrassahs* setup using Arab country's funding. If you want to carry raids then do it on these Arab funded *Madrassahs* and not just for the sake of maintaining balance. You want to raid all *Madrassahs* including this *Madrassah* of Allama Mufti Jafar. They themselves say we know there is nothing here then why have you come to raid us? You have been checking the notebooks of children, you are looking below their caps just for the sake of *evenness*. What is this balance? Don't you know which *Madrassahs* are breeding terrorists? You know it very well because you have yourselves made them, so go and raid and arrest them. You are herding all *Madrassahs* with the same stick; this is not a confrontation against terrorism, in fact it looks like there is some other agenda.

If you want to fight terrorism then you should know that the religious group has been pushed into terrorism and in reality, they are not terrorists; someone has brought them into this field. You should be attentive that the RAW agents who were arrested in Lahore, Karachi and other cities which came in newspaper were residents of which country? There was not a single RAW agent arrested who was Indian, they were all Pakistani national. They were involved in anti-Pakistan operations and

agencies arrested them, got evidences from them and it is possible that they will take confessions from them also. If some Pakistani has been arrested as a RAW agent, then against whom the operations should be carried out? You should understand from here that when a Pakistani works as a RAW agent for someone, and if you want to end the terrorism here, then it will not end just by arresting these Pakistani agents. You should cut the roots of those who have made them as agents. You should be fighting against RAW so that this virus can end forever in Pakistan.

Media – Fueling the fire of Terrorism

In January of 2017 there was a massive blast in Parachinar where a large number of Shia believers were martyred. And this has happened at a time when the claim for peace has been highlighted in Pakistan, and hence this blast has high a significance. This has been 7th or 8th blast in Pakistan but the attention given towards this one has never been seen before. Everyone is keen to know why this happened? As you know that Parachinar is almost in the hands of Pakistani forces, and rangers and even if the residents of Parachinar when they go there, they are checked at several posts and then allowed to enter inside, and now with such strict checks the happening of this incident is a matter of a much bigger concern. When everything is under control of the government, and such dreadful blast happening has got high attention towards it.

The point to be understood about this incident is we should not think that this is related to Parachinar only. This is linked to the nation as well as global situations. This incident is doing a *Tafseer* (interpretation) of many things. Last week PEMRA, the authority that controls the broadcasting, has applied restrictions on a TV juggler Aamir Liaqat who used to play with religion on TV. He had raised some concerns and did criticism on the social activists who were arrested by the government recently. These social

activists who are social workers from the civil society. People from civil society are those who leave religion aside, and do some social work on the basis of humanity. They do not like religion instead they distance themselves from the religion, and if need be they oppose religion as well. Some persons from civil society have been declared as *missing*, although everyone knows what has happened but don't want to expose. This juggler has said something about these activists on social media.

Social Media – Center of Indecency and Corruption

First, we should know that social media across the world and in Pakistan also has become a center of indecency and corruption, Since the work which was in the hands of few organizations before has now come in the hands of every individual. You can say that every person today has a TV channel in his hand on Facebook and similar other websites. Every person, whatever he has on his mind without thinking speaks out on social media. There is vulgarity, propaganda, hatred, lusts, corruption and everything is being done on it and these Satans have made this thing and handed over to people. Many are frustrated in their lives due to social media. There are many divorces that have happened due to social media. Wife has her page on Facebook and husband comes home and wife is busy on Facebook. They are chatting and busy in their groups and they don't talk to each other for weeks. The family system has been destroyed by social media. They don't pay attention towards children. On social media these civil society workers posted certain things on which this TV anchor commented that these activists have insulted the Prophet and religion. Since Pakistan is an emotional nation, and even though most of us are non-religious, no one knows how to recite Quran and understand what is inside it, but no one can tolerate if someone places Quran on the ground. Near Lahore recently a Christian couple was burnt alive when they heard that they insulted Quran.

This anchor said that these social activities have been insulting the religion and the Prophet, and it is true when such things are said against someone in this emotional country, people will take severe actions against them. This anchor is a trickster and his entire family is some cheat and dramatics. His brother went to Iran for some time and came back in a misguided way and claimed to be a lord of all religions. He claimed that Prophets, Hindu Gods have entered inside his soul. He recited a majlis of Qalandar and made everyone bark as dogs. His one brother is a leader of Sipah-e-Sahaba branch. This anchor in Ramadhan does sacrilege of Islam by bringing singers, dancers on the show, and no one realized what he was doing. Now when they came under pressure because civil society are beloved of the European Union, the UN as they do activities without religion. If someone does even a little to one of their servant they make a lot of noise. This anchor created a threat for the personnel of the civil society by arousing people. These activists are missing but when they come back, then out of emotions someone can possibly take action against them. Hence PEMRA banned him. To this person, who has created a threat for some members of the civil society you have issued a notice of banning him from media, but in fact a case should be filed on him for arousing someone to murder someone. He is not the only journalist or anchor who has created threat for someone. There are many such journalists, editors, anchors who have committed big crimes in media and have named personalities, centers, areas by associating some with Iran, Hezbollah in the newspapers and media thereby putting them under direct threats and dangers. They should all be punished the same way.

What happened in Parachinar has been done by these criminal media anchors, and journalists. They have created this atmosphere and gave impression that people from Parachinar go to Syria in an organized way to fight against ISIS along with Iran and Hezbollah. The last statement which was issued by this accursed *Rahim Ullah Yousuf Zai*, who is the formal

supporter of Taliban in the media; a formal spokesperson of Taliban and introduces Taliban's policies across the globe and is the trusted one by terrorist groups. When Taliban wanted to do negotiations with the government they selected one political person from *Tehreek-e-Insaf* and said he is also our trustworthy person. This Rahimullah is also a trusted person of Taliban and there has to be some story behind for terrorists to trust someone. This accursed has issued a statement that until the time the foreign intervention is present in Parachinar, such incidents will keep on happening. By Foreign intervention he means that anyone from Parachinar until the time keeps on visiting Iran, and Syria these incidents will continue. These are the criminals who have created the atmosphere to expose Parachinar to threats. They have created this atmosphere to unarm only two agencies. All agencies of Pakistan are armed since there is no national government's intervention, there are no police forces there. These agencies people's lands, houses, vehicles are not registered and they have their own system. Only the Orakzai Agency and Kurram agency have been ordered to give back their arms. If you want to unarm agencies then other agencies have more weapons present in them and they should be unarmed first. First you create a wave on media that these people go to Syria and fight, then you want to unarm them but other neighboring agencies you want to keep them armed? This is a weakness of Pakistani that they go everywhere. Have Pakistanis not gone to Yemen to fight. There should be a total ban that no Pakistani should go on rent or any excuse to fight in other nations. The government should block this.

In Syria there is a sacred shrine of Lady Zainab (s.a), the children of Imam Hussain (a.s) and the sacred head of imam Hussain (a.s), and you know that these terrorists' sacrilege these shrines. If some believer goes there to stop the sacrilege of these shrines, you will punish the entire Parachinar? If someone goes from Punjab somewhere you will punish the entire Punjab. These editors, columnists, anchors are big criminals behind

the scene who create this atmosphere of theat. The government will unarm Parachinar with the claim that we will take security arrangements in our hands. It is a sealed town, then how come a suicide bomber reached there? There are many universities in Pakistan from where terrorists have been caught but will you punish the entire university? The Pakistani government should strictly control this and not have this dual policy that the one who goes to Syria is punished, and the one who goes to fight against Yemeni is declared as *Mujahid*. One sided killing of Shias has been done in Pakistan and this community has never used their rights also for defense, and for them you do such planning? This is all due to the dictation of *Ale Saud* which is acted upon in Pakistan. This is shameful for everyone in Pakistan that those who are breeding terrorists give dictation in our country.

If an anchor speaks against Civil society, you put ban on him, but against Shiite if someone creates threat, should you not ban that TV anchor and that channel should not be stopped? It is clear that in Pakistan there is no sympathy shown against Shiite by anyone. Some jugglers come for vote to show sympathy for Shias. They have considered Parachinar as Bahrain to do oppression on them.

One more issue in Parachinar is the *fitnah* after the elections that took place. Such a beautiful place, in which elections took place, and the fitnah that was sowed inside believers is still showing its effects. There used to be a centralization there of whatever nature, but look now. The people of Parachinar should resolve their small issues internally and do not allow any Fitnah to establish. If you want to go to parliament then let the tribe sit and decide who will be the representatives. There is fitnah in the essence of elections. In Gilgit, Baltistan you see the fitnah created by elections. You can decide one by one, every group to send their representative to the parliament. Do not fight amongst yourself and not

give these Satans any opportunity. At present there is malice, hatred towards people of Parachinar. These journalists have high hatred and they are spreading it against Parachinar. The people of Parachinar should realize that when such detesting enemy is present for us, how should we live with each other? We should make room for each other so that outsiders should not get a chance. The scenario that is being created but we hope that the plan like that of Bahrain does not become practical in Pakistan. We also request the Pakistani government that Shias have the same rights and Pakistan cannot be divided on the basis of religion, that they take some actions against Shiite and some other actions on others. If you do this way then will you end sectarianism? To do this, for all Pakistanis there should be one law. If you make separate laws on the basis of religion, then this is from where the sectarianism starts. Some suspended and banned groups take rallies out and some who are peaceful are put in Schedule 4th, and such things prepare the grounds of Sectarianism and these journalists are breeding the fire of fitnah. These anchors, reporters and channels should be controlled and Shias should be attentive against them who create dangers for the entire community by issuing such statements. Their tongues should be stopped, if not possible then pull them out. Till this does not happen, these issues will not be resolved. It is astonishing why this blast happened in Pakistan. The community of Parachinar are resistive and have fought against a big siege in the past all alone on their own. These blasts will not demotivate them and their passions will go up further and will remain firm. These accursed Satans will fail in their plans.

Chapter 4

THE SOLUTION

A clear point made in the previous chapter was that if you want to fight terrorism then you need to fight its cause, and the first group that is involved in terrorism is the secular group which has hired the religious sectarian groups. They have got them down in the field by capitalizing on their weaknesses. These are the root causes to which if we are not attentive then terrorism will never end in Pakistan. If you want to catch only certain groups or put bans on them and no one touches the mastermind then this will never end. This terrorism is useful for whom in Pakistan? From where are they funded and from where they get supplies? Until the time we don't target these causes, terrorism will not end. This work cannot be done alone by forces, police, government, rangers or any other group unless the masses get involved in it. If no other group within the masses is interested to end terrorism, certainly the Shias definitely want the terrorism to end and that too from the roots.

Social Pathology

There is no think tank to be seen that study's the causes behind terrorism. This is a vacuum in Pakistan that there is no think tank that can analyze the issues on scientific and intellectual grounds. In other states such projects are given to universities and scholars. Like if there is an economic crisis then banks are not asked to control it; banks are the implementation section of the economy they are not the think tank. Whenever the banks are asked to improve the economic conditions of the state they will not be able to do it and instead destroy it further. Those who can do this work are scholars and experts of economy; they have to sit and analyze the causes of the economic crisis and downfall. They should point out the causes and tell it to the system to change certain things or put restrictions on certain things. Similarly, for homeland security you cannot just give it

to Police to establish peace; first a group of experts, and scholars need to sit at the back, study, and analyze the crimes in the country and then prepare a road map for the Police to implement. This segment is like Pathology which has to diagnose the causes of the disease. But in Pakistan we are trying to cure without diagnosing hence we don't know which vein they will cut.

We are daily associated with pathology. When someone is sick we take the patient to the doctor and doctor asks to go to the pathology first to carry out tests; the tests are done and Pathological laboratory sends the report to the doctor and then the doctor will prescribe medicines or surgery etc. Now a day It is not like the traditional physicians who would hold the pulses or by looking into eyes and then directly give medicines. We have medical pathology but not social pathology. In a gathering in Karachi University I gave a suggestion that you should establish a faculty for Social Pathology. Their Vice Chancellor agreed to this suggestion and after the program sat with me separately, and said that for the first time I paid attention towards this point but it is a very difficult thing to do considering the bureaucratic nature of our systems, and if we have to do it formally then it will take a very long time. He said to me that if you support us and we can establish this informally in our university but we don't know anything about this, as it is the first time we have heard this term of Social Pathology although we realize and understand its need. He expressed his readiness to do so and we also pledged to support them, but in Pakistan doing it is also not easy to do things informally and hence it did not happen. It is a need which Government should fulfill; they should gather scientists of sociology who understand the society; whose roles are to understand the nerves of the society and then after establishing this faculty they should be given time to analyze the causes of the problems of the society. This work is not happening because the Pakistani temperament is not built like this, that Scholars should do

something productive. Our appetite of Scholars is fulfilled by those *Zakirs* who do not even have basic education. Religion which is the most difficult and deep faculty of human beings; and the person who is teaching this religion if you ask him what is his education you will be surprised. If we replaced our doctors, lawyers etc. with someone like that, then it will be a total destruction. This is a gap and vacuum in Pakistan that no work in Pakistan starts with scientific analysis whether its economy, security or defense. We don't find this to be necessary.

About corruption we should analyze and find the causes and the roots of corruption. If they catch one corrupt person who has done a big scam, people become happy. If the dacoits and thieves are killed, does robbery end with this? By killing terrorists' terrorism will not end it will only end when its roots are eradicated. Its roots are not known to police, engineers, doctors and industrialists; they are known to sociologists only. A doctor can do medical pathology but not social pathology. Like for example if someone has studied Arabic in a *Madrassa* even then he is not automatically a scholar. This is a real incident about a young guy who came to us, he went to a doctor for some sickness. The doctor measured his pulse and told him that you have a brain tumor and you are going to die very soon. He was the only son and his parents got very worried. After a long time, we became aware about this issue; then we asked some of our friends to get him tested. He was taken for MRI tests and found out that there is nothing except that his nose gets blocked due to which he has breathing problems. This young guy says that he took that report and went to the same doctor and doctor said the report looks fine but you still get a brain surgery done. He was astonished as to why should I get surgery. He just wants to get him operated to get some benefits for the doctor. See if Pathology is not there and if we diagnose without Pathology then a tumor will be found in the brain every time.

Today they say that so and so place has elements of terrorism, which is not true. The roots of terrorism are somewhere else which is also known to everyone. Social pathology is not just required for countering terrorism instead it is necessary for the survival of the country. For social pathology we need social scientists and for that we need social sciences and Pakistanis hate social sciences and no one is ready to study them. In Social sciences there is Philosophy, there is human psychology and various other sciences which are known as human sciences. If we see the stability in the Western society then it is not due to their industrialization; it is their social laws that have made them peaceful. They got this prospect from social sciences to make their society strong, the society to which we are also attracted. If we want security and stability in Pakistan both internally and externally (which by the way is not present) due to which the enemy is also indicating its evil intentions, we need to develop seriousness.

Imam Ali (a.s) says that you should adopt *Jidd* (practical, continuous, determined seriousness) which is not present in our community. Ameerul Momineen (a.s) supplicates to Allah in *Dua –e-Kumail* for *Jidd*. Seriousness to the extent of *Jidd* means; to test and examine everything first, and then decide whether you want to do this or not; then only our issues will get resolved. All the singers, players, and dancers come on media to talk about the current affairs and are doing political talk shows. You don't see scholars sitting on media instead you see jugglers and our community likes performers. We like only that *Zakir* who entertains, juggles, makes fun on the pulpit and we don't like serious speakers. The country at present needs seriousness and I am demanding this from the community and the youths. You are the architects of the nation and not the government's. If a young guy's inner self gets stirred, then he can change the situation and we should prepare ourselves against the plans of destruction that are made for us.

Symptomatic cure of Terrorism

Pakistan Army is carrying out operations against the terrorists, and at times some breaks come when there are no terrorist incidents. I have repeatedly said this that we should not be deceived by these idle break periods. Zia-ul-Haqq started terrorism, and during his time also the breaks would come because terrorism also needs some breaks and breathing time to reorganize, train cadres or sometimes they do not find the right target on time. After Zia-ul-Haqq, the governments kept on changing and in all governments the terrorist activities continued and then some breaks also came. When activities start we get worried and when the break period comes we become happy and praise the governments. Many of the leaders of Pakistan took the blessings of Shias when the breaks came and then again, they started. Parvez Musharraf was even titled with *Ameer-e-Mukhtar* but again the activities resumed.

Once the present government claimed that we have ended terrorism but very soon the Interior Minister of the Punjab government's cabinet became the victim of the same terrorism. This means terrorism is not annihilated, and by this way the terrorism will also not end. The way the government plans and starts this operation is never going to end terrorism. Terrorism is an evil tree which swells every day. If you start to remove its leaves then new leaves will come on it, instead you have to pluck it from its roots. When the mastermind of Zia-ul-Haqq of developing terrorism i.e. Hamid Gul passed away, some of us were thinking that now some difference will come. It will make no difference even though he was the father of terrorism, but he was not just an individual planner of all these; he was part of a system that developed terrorism.

Let me present one principle which is related to this terrorism and can be applied in other segments of life also. That principle is that whenever a difficulty arises, like if a person becomes sick and there are sympathetic people around him who want to see him cured, if he has high fever then many of the near ones try to fight the symptoms. Fever is a symptom and

not the cause of the disease. People try to reduce the fever and even if they reduce the fever then still the disease is present inside the body. If you want to cure a person then cure is not the name of treating symptoms, instead it is the name of curing the cause behind the sickness

The formula is that every action has a cause or causes behind it. Everything has a cause, and everything that results from the cause is its effect. If you want to achieve something then you should not go after the effects but instead go after the causes. Allah says that I have the treasures and also the keys to it, so ask the keys to the treasure of Allah. In the supplication which you recite after Zohr, "O Allah! I ask from you the *"Mujibate Rahmat"* "*Mujib* means the cause which brings out the mercy, and then "O Allah! I ask from you *"Azaeme Maghfiratek"* means; I don't need your forgiveness instead I need your intention that forgives; which means if you intend to forgive then there is forgiveness at every step. If you ask someone to give you his car, he says go out and take it, but he does not give the key, so this car is of no use. You should always ask from Allah the keys or the cause for everything.

It is natural that when those government organizations who are running the country; they for the sake of power, or personal interests clash with each other, then the nation and the masses get abandoned. Then they tranquilize the nation in a very stupid manner. Whenever there is a political instability, they immediately arrange a cricket match which soothes the community. It was in the news sometimes back that a musician's brain was to be operated. He could not be made unconscious due to some risks, so for his tranquility they played music so that he got involved in it and they operated him, this was outside Pakistan. For Pakistani community the cure for every pain is cricket. When cricket is announced it means deep wounds have been inflicted or are about to be inflicted. They send their teams or bring some other team. It is easy to indulge non-serious people.

On one hand they are trying to finish terrorism too. Some are sincere and want to end this but with these types of efforts even if they try for 100 years they can't end this. This is because until the time the root cause from where it all started, is not ended it will not end. The actual element of terrorism is not a few terrorists whom you catch. They are the results and fruits of terrorism; the roots are different. This is an intellectual law that if you confront the effects and not the roots then this encounter will be useless. To end disease, you have to end the roots and not its symptoms.

In Pakistan this deviated encounter does exist to some level, and can be also seen sometimes but on a very surface level, the times when the encounter has been against the *signs of terrorism*. They declare some groups as banned and remove their banners of terrorism. But then you see the same banned outfits are the most active, they do open programs, and media gives them coverage. Those who accept this terrorism, it is not necessary that those who are accepting or claiming it they are the ones doing it. This is not a proof, everyone knows the root and cause behind this but no one has the courage to touch those roots. They are so effective, and powerful that no politician has the courage to even take their names. Neither media nor officers who even sacrifice their lives have the courage to point them out.

Punishment to the pioneers of terrorism

Those who formed these terrorist groups are not questioned at all, no cases are put up against those who made such groups and against those countries who spread this mischief inside Pakistan, why don't we break our relationship with those who fund this terrorism. Instead we have friendly relationships with them and their activities in Pakistan are growing day by day, and on the other hand we are fighting against the

symptoms of terrorism. With such fight we will never be able to finish terrorism unless we fight its causes.

There are two types of causes of terrorism; internal and outside the country. Those countries who are external causes, they have promoted terrorism in Pakistan big time. America wanted to fight the battle in Afghanistan and they made terrorist groups inside Pakistan. The biggest host of Terrorisms in Pakistan is America and the countries who invested money to promote terrorism here are Arab countries and specifically *Al-e-Saud*. They promoted terrorism in broad daylight and were the main instigators of terrorism in Pakistan. They have their agents formally working in government organizations. These are the main causes which should be eliminated. But they don't touch any of them and neither do they stop Ale Saud or American interference in Pakistan, they do not stop their agents working in the government, neither do they control the religious elements who nurse all of them. They are only cutting the leaves and the branches and the result is what is happening now.

As mentioned before as well when an attack happened in Pathankot (Indian occupied Kashmir) they blamed Pakistan for this. I mentioned that this has become a strategy of blaming someone else by attacking yourself. They attack their own assets and then make this an excuse to attack someone. There was a possibility that revenge would be taken in this pretext after Pathankot attack and it happened in KPK. This thing will only stop when both internal and external causes are eliminated, and in order to do that cases should be filed on the main instigators even if they have gone inside their graves. Cases should be filed on people like Hamid Gul because these wicked trees were planted by people like him. Those who are alive criminal cases should be registered against them, and they should be introduced and announced that these are the people who have destroyed Pakistan. Those religious faces should be exposed that they are

the people who are the causes behind Pakistan's destruction. Those external countries like Arab nations should be exposed and told to people that they are responsible for this curse on Pakistan today. Making them friends and considering them guardians, and elders and then expecting to end terrorism in Pakistan, this will not happen.

Even if you arrest several terrorists on daily basis, these are just leaves which you are cutting, and that will not help. The terrorists are getting killed every other day in operations. Their end is only this that they should be killed in a meaningful manner. The Quran says that those who are murderers, terrorists they should be killed in a manner that is a lesson for others. They are killed but not in a manner so others learn a lesson that no one should come on this path. Until the time the actual roots of terrorism are not uprooted, it will not end from Pakistan. This is because terrorism has become deep rooted and engrossed in Pakistan in various government departments, provinces and in several places at once.

You have to cut down the roots. Is there anyone who has the courage to do this? The one who can give salvation to Pakistan is only the one who can cut these roots. Then there will be no terrorist born in *madrassah*, university, college or in any other place. But this act will not happen because you know how deep these three roots are. Everything can end but this is not easy to do.

Eradicate Takfirist Ideology

As discussed in the last chapter that the first root of terrorism are the visionary centers of *Takfirism* who consider killing Muslims as legitimate. In early October 2017 one difficulty that the government faced was in the election forms, and it was related to the Seal of the Prophethood (*Khatam-e-Nabuwat*). They did some minor changes in the document of

the Oath of the finality of the Prophethood, against which the religious groups, and political groups spoke so the changes were then reverted, and again the same old document was issued so that Qadiani's can be kept out of this. The Interior Minister became sensitive and asked for a conference of all Muslim sect's scholars to come out and get a mandate in place that all mosques cannot issue Fatwas; there has to be certain criterions on who can issue the religious verdicts. This is creating disturbance in the country. They will have this conference done soon in which they will invite scholars of all sects to come with a resolution that not all scholars and mosques are allowed or eligible to issue any verdict. This matter of issuing Fatwas left and right, and verdicts by everyone in Pakistan has burnt this nation down, and this has been happening for the last thirty years; that so and so are infidels, and they should be killed. This has been going on for thirty years, and you did not realize that this should be controlled when Shias were being killed. But now the direction of these verdicts has moved towards the government which you want to control, and take the rights of issuance of verdicts so that the country can remain safe. There have been open killings, martyrdom of hundreds in each blast but no one did anything. But when Peshawar school incident took place they immediately came up with an action plan. The same should be applicable for everyone and every Pakistani, irrespective of what group they belong to, the government has to protect them. Today the Interior Minister has said that the verdicts being issued from every mosque is creating chaos in the country. You should not just control the Fatwa, but control and end these mischievous Muftis and this mentality and its foundation should be destroyed. You should put control on these thoughts and this should be declared as illegal and the entire nation should demand that this thinking of considering the killing of other Muslims as legitimate should end. It should not happen when the government is challenged with a Fatwa you take action but when it is affecting the masses you don't do anything.

They don't even express sympathy on Shia killing and in certain cases like Quetta they do not even issue a condemnation statement.

At times they go around sealing one or two such madrassahs' but it will not help, instead this thinking of Takfirism should be declared as strictly prohibited by which anyone, anywhere in the world who believes in killing a Muslim because he is not from his sect, then such persons should be banned and in fact this should be declared as a crime in Pakistan and globally. When this happens then we can say this is an encounter with terrorism.

Until the time the sources of terrorism are not ended, terrorism will not end from Pakistan. Even if you kill all terrorists still it will not end because the production house and factories are still present. If you notice millions of chickens are consumed in a day in Pakistan; chickens are slaughtered, cooked and eaten but still you see the next day the market is again full with chicken. If you kill all the chickens in market, and eat them, will they end? This will not, until the time poultry farms that are producing the chickens are present. Every day millions of chickens are reproduced despite of all of them being consumed.

Terrorism is also like this, by which their factories are present. There are three factories; first ones are those supporters that are inside the government and the media, and theocrats; then the Arab nations who support them with means and finances; third is that Ideology of Takfirism which provide the verdicts for killing other Muslims. Terrorism in Pakistan was born with this axis of evil, and unless these three are eliminated terrorism will not end. In the era of *Zia-ul-Haqq* a board was made to design and draft terrorism from the public treasure itself. Similarly, for personal gains the Arab nation's support was taken, and they were allowed to openly interfere in the country. Then the various schools and

ideologies which are present in Pakistan and specifically Takfirists were selected, they were sponsored, their centers were promoted against other sects. This is because their plans were only this, and they had intense hatred towards other sects.

The Arabs come here to rent our people for global terrorism. But our government does not even summon the Arab ambassador and tell him to not take our people from here for fighting in Yemen, or Syria or any other front. Pakistanis are not the creation who can be hired, although due to poverty the people from here visit Gulf countries for work, but do not make them hire killers and use them for terrorism. If you Arabs have money then spend it for the development of your own country, and do not even give charity to us. Though we are seemingly poor but we are independent and this nation has a lot of potentials and we are capable to save our own nation and develop it. This feeling of slavery and shamefulness due to the money that comes from Arabs will never allow terrorism to be eliminated from its roots in Pakistan.

Make your own protection

What is happening in Parachinar is part of this plan. They are afraid of the courage, passion and strength of the *believers* from Parachinar and now they want to break this. How is it possible that in Parachinar which is a very small town that is under the complete control of the army but still every day terrorist attacks are happening there? Wherever they want they make it secure, but where they don't want they ensure that insecurity is there. The believers of Parachinar should be attentive and make their own arrangements for security. For how long will you wait for others to come and give you protection?

We have seen in rallies, and strikes where people sit and everyone demands that give us protection, and if you cannot then tell us that government cannot give us protection. I was present in a rally and I asked them; which language do they have to use to tell you that they don't want to give protection to you. They do not want to give protection and neither do they like to do it. They have clearly told you and proven you for thirty years that we are not concerned about your security, and even if they want to give security they will give it to your enemies. Hence, we should arrange our own security. The people of Parachinar know how very well to protect themselves; they have done this before against the enemy forces of Taliban and on several fronts. They should now make attempts to make their own security arrangements. The law of Pakistan also permits everyone to make their own arrangements. They send notices to organizations, and schools to make their own security arrangements by putting cameras, wire fencing, guards etc. so, when government itself is asking you, then why we should not do this? Specifically, when *Ale Saud* is making such a global atmosphere against Shias, and in Pakistan also they have got everyone involved to do this.

They have shown these fake pictures that Shias from Parachinar are going to Syria and other places to fight against Takfirist, and all these journalists who spread this fake news are responsible for this terrorism in Pakistan. There are people involved from inside the armed forces; recently when the Shia believers arranged a protest; firing was done on them. When the Governor of Khyber Pakhtoon questioned the army officer as to why he fired on the people? it was in the news as well that Colonel Umar opened fire on people that were protesting peacefully. When he was questioned why you opened fire on people? What had the people done? The Governor apologized to the people for this. But this is not going to stop; it is being repeated and the media journalists who eat the leftovers of *Ale Saud*, they have made Parachinar as the target by making all terrorists

attentive towards Parachinar. We pray that Allah will protect these believers and grant them firmness, and stability and they should not leave their homes by making some justifications for studies or business. This is their target to evacuate Parachinar and this settlement of believers gets dispersed. This is the deception of Satan but certainly Allah also has his own plan.

From demands to duties

On 23rd of June 2017, a series of terrorist attacks took place in Pakistan resulting in 96 dead and over 200 wounded. They included a suicide bombing in Quetta targeting policemen, followed by two blasts at a market in Parachinar, and the targeted killing of four policemen in Karachi. The believers in Parachinar aggressively protested; presented their demands and government authorities went there, accepted their demands and we thought the issue is closed. What was happening on the street got closed but not the actual issue which is terrorism, enmity with Shiite, the central target of this wave of Shia Killing is Parachinar and that still remains.

The step that was taken now, was to give compensations, which itself is a disliked subject i.e. to bargain for martyrs, protest for the rates and it is not something good. As per Allama Iqbal, do not ask for the compensation of these martyrs from the states, those martyrs whose status is in line with Holy Kaaba. The demands were set and some were fulfilled and some would be fulfilled. The demands were executed but the obligations, duties of the community, the youths, the intellectuals and the scholars still remain. We have been talking about demands and not our duties. If this is our expectation that these people will protect us, then look at the last 30 to 40 years that they have never demonstrated any seriousness. You can study the last 3 decades of history that they have not even had the

slightest of sympathy against Shite. Today the global army that is formed for dismantling Shiite, these people (Pakistani forces) are part of that force. So how can you expect that they will give protection to Shias here.

The international forum that has been created at a global level under Mohammad bin Salman they have become part of it, they should have told we don't want to be part of it as this force is made against Shias. Why are they becoming part of that force? Parachinar is no more a local issue it is part of that same global war against Shias. They are fighting the war of Syria in Parachinar now, and taking revenge of Syria in Parachinar. There is a lot going on and it will continue. Terrorism is not an issue of Parachinar only, it is a national issue across the country. As mentioned above, if you want to uproot terrorism then you will have to eradicate its *Three Roots*. The first root is the school of thought, the vision of takfirists and until the time these factories are running, and you just raid markets it won't end. The second root lies in the fact that terrorism in Pakistan was not started by the people, it was done by government's people during the Afghan war. The third root is the Arab's financial support. There is no operation done against any of these three roots. Till date not a single government's authoritative person has been caught as to why have you supported terrorism? There are no cases filed against any Arab nation. Then how can we believe that Parachinar should comfortably sleep now as the issue is resolved. Parachinar has never been protected by the government, in fact all their tribes they have been protecting themselves and also protecting Pakistan. These tribal regions were formed specially for this purpose only i.e. to protect Pakistan. These areas were kept as free zones, so they could protect Pakistan. But today we see those who were expected to protect the nation are in the need of protection themselves, and this is because some internal diseases have been inflicted upon them like breaking them in groups, and parties which has weakened Parachinar internally. Parachinar was a region where someone would be scared even to stare at

it, but now there is no hesitation left in even attacking Parachinar. They have first created these evils and diseases inside it, after which they have started this aggression. Hence now after demands being fulfilled, the duties are still remaining to be delivered and arrangements should be made for delivering those duties, primarily making a strong security arrangement yourself. We are hopeful considering the level of sincerity of these Shia believers who are still firm after so many sacrifices and are demonstrating perseverance. They will make Parachinar safe again and eventually the entire Pakistan.

Non-Seriousness of Shias and Sunnis

In Pakistan one more astonishing incident that took place in Dec of 2016 is related to one terrorist. The son of this big and well-known terrorist, whose son is also a terrorist won provincial elections with a large majority. This person belongs to a terrorist group and his name is in *Schedule 4* which means his nationality is revoked and he cannot participate in any national political activity, but surprising he has won the elections and everyone made him successful. The strange news which was there is that he has won with the help of Shia votes in Jhang. This is the deep vision and insight of Shias, our Shia leaders and Shia political groups whose results we have seen, first in Gilgit and now in Jhang. This is an astonishing fact that he is a criminal, a terrorist, banned and on the other hand he was allowed to participate in elections, made to win with full majority against a candidate from the national ruling party who lost it to him. The ruling party has not lost any mid-term elections because they have the means to win these elections. Wherever due to a candidate's termination, re- elections have taken place the ruling party has won but this is the first such election where the ruling party has lost and that too in their own province. And after winning this election this person has immediately done alliance with *Jamiat e Ulama* group of *Fazl-ur- Rahman*.

His father was that satanic element who had openly expressed Takfirism in Pakistan on which everyone supported him. He was also a member and pillar of this same party of Fazl-ur-Rahman, then he came towards Takfirism and started this sedition of terming Shias as *Kafir* (infidel) for the first time. His son is also following his footsteps now.

Another news is that the Home Minister had a meeting with the banned terrorist outfits and groups, to which some politicians have objected. Despite of these objections these banned groups have met the Home minister and pursued him to accept their demands. On one hand they declare them as banned, then they meet them and accept their demands. This shameful politics is going on in Pakistan but what is disturbing since the last twenty-five years is that the atmosphere of awareness and awakening is missing. The Pakistani community both Shias and Sunnis don't have a correct analysis and interpretation of the situation. They cannot grasp the situations properly which is because they have been deceived and indulged into tricks by these deceivers, and jugglers on pulpits and treacherous people. They are not attentive towards the actual affairs; neither there is anyone to inform them and nor are they willing to listen. There is a lot happening with the community but deeply concerning matter is that they are not even aware as to what is happening with them. We should be aware about the right things and understand what conspiracies are being cooked for you and where the situation is going towards.

Anxiety on baseless issues

There is anxiety present in Pakistan and a merciless "*Tanafus*" (penetration) is ongoing. *Tanafus* is a Quranic term also used in *Nahjul Balagha* which means; 'to fight with each other for the sake of acquisition of power'. To defeat, encounter, and dominate each other is known as

“*Tanafus*” and this is at its peak in Pakistan. The fight which is going on for power now has paralyzed the entire nation and indulged the minds of people by media, courts and everyone. They are all fighting to eat the dead like vultures jumping on each other. They are not refraining from anything to do for the sake of power. They are all criminals who for the sake of acquisition of power have destroyed the nation. It does not matter who wins at the end because when roosters, dogs and animals are made to fight it makes no difference for the spectators as to which animal wins. What difference does it make for the community as to who comes to power, and even from this dead corpse this community will not get anything. There is no possibility to get anything for the community whatsoever, unlike the meat of the sacrificial animals where the meat is distributed into parts, and at least one part is kept for the beggars. The Pakistani community are those beggars who are waiting on the division of the meat of a dead corpse, but still they are not even going to give anything from it, and even if they do give what will you gain out of a dead corpse meat. They are themselves poor and beggars. This is the fourth government in which this crisis of electricity is ongoing. It started from the government of Parvez Musharraf and till now you are all living on *UPS*. This dead corpse of power went through groups and you did not get anything. You are just wasting your time and getting your minds disturbed by this. There is a psychological effect on everyone when they watch this drama of “*Tanafus*” on media day and night.

I have said this before; that education and its methodology has psychological effects on children. Like this English education you are taking, and the religious education you are taking, all of it carries a psychological effect with it. If you do an assessment on those who go to Seminaries, *Madrassahs* to acquire education they develop a debatable (*Jadali*) mind by which they always try to find faults in everything. They even start to debate on hypothetical issues when real issues are not

present, like if Mars becomes Moon then what will happen? They fight wars in imaginations. You can speak to the students of Madrassah of any school and you can see that their mind has become arguable. They do not guide, counsel, preach and teach wisdom but only disputes and that too in a non-ethical manner. Like if he teaches Quran with *Bismillah*, he will first start to dispute on the meaning of Bismillah. They make simple things also complicated and this has a psychological effect on a man's mind. It is necessary to ponder over the fact that the mind of a person does not become doubtful about everything, and should achieve certainty on some level. This means the more a person studies the religion he should reach some level of certainty. If you see the religious education's syllabus, the student studies one book and then the second book from another author who has criticized the views of the first author. Why can't we make a simple syllabus which has just one book for the subject? If something is void and needs to be avoided then do not bring those books in the syllabus at all. They should only bring certain things in the syllabus so that the personality of the student becomes that of certainty and not that of criticism. Then the last grade of lectures of *Dars-e-Kharij* goes to the peak of criticism where everything is criticized and only the views of the speaker whose *Dars* is being attended is deemed as correct. If we give education in this manner then the outcome will never be that of certainty. The education done in this manner that is disputable, and critical manner, it has a psychological effect on minds. As it is said in traditions that people are not on the religion of the Prophets, they are on the religion of the Kings.

At present the politics that is ongoing in the country every person's mind is indulged in it. It is not that we are unconcerned. There are cases of corruption going on where each other is accused of being a thief. Do not dispute as to who is the thief, at present everyone is a thief. Are the judges not thieves? Those who are catching and are being caught, are

they the only thieves? When everyone is a thief, why are you confused by the media? In the past governments there were two prime ministers who were declared as ineligible for the post due to corruption. Have you noticed that when they catch a thief, he turns out to be a Prime Minister or some General, and still you want to adopt the same path of elections, and democracy, and parties to solve your problems. Why can't you come on the right path? Why don't you learn lessons from these incidents? This is an act of mockery which is being done in the entire country and everyone is non-serious. I will explain this more in the next topic, now about the new incident which has happened.

People's determination

An important point related to terrorism is that people are just spectators, they watch news, read newspapers, send messages and express grief about losses. Is this your only obligation? People are practically unconcerned. Until the time the entire community does not intend to remove this cancer, it will not be eradicated.

Few days ago, an army officer said that only one institute, be it the army itself cannot remove this evil tree. This tree was planted by one person, Zia-ul-Haqq. One fool has thrown a stone in the well and then everyone is using all their force to get it out. This is what is happening. Public intention, determination, and willpower are necessary and these things media can develop. This is the religious obligation, and communal obligation to create an opinion in the community against terrorism. Whereas media is promoting terrorism, they take interviews of terrorists to grow their ratings. Two days ago, an interview was aired by a media channel. The interviewer says that how much dangers he has to go through to reach Afghanistan to meet an ISIS person to take the interview, and then presented on the TV about what that ISIS person is saying. Is this

your obligation to make people aware about the thoughts of an ISIS terrorist? You are using national resources, you are wasting the time of people and then at the end you are taking interview of ISIS just to show that your channel is leading. They are asking the terrorist on why you do this? He says that they (the victims) are supporters of America and hence we should kill them. If some simpleton listens to this, he will be convinced that ISIS is doing the right thing. One question was asked, why you kill Muslims? The terrorist gave proof that Muslims are not all innocent and they are also responsible. They martyred a student in Bacha Khan University and gave proof that this student would grow up into a criminal hence we killed him.

To drive the communal public's intention and will is the duty of the scholars as well. They have kept those scholars who are supporters of terrorism, who come on TV to support terrorism. They bring an alcoholic scholar on TV, naturally people will hate these scholars. You should bring real scholars on TV, who talk about peace. We have to make communal will power, write books, do programs etc. on peace in the country. Media and *Ulama* are the two entities who have to do this. Media is after their channel ratings and those scholars who behind closed doors are supporters of terrorism are brought in the front. This is spreading hypocrisy.

Since the world knows that in Pakistan, the beginning and ultimate end of terrorism is always Shias. They target everyone but they start with Shia. For Shias there is no mercy for anyone. Shite has been the most squeezed and has suffered the most losses from terrorism. You cannot come out of this loss by being spectators. If others cannot do it, then Shia believers, and Shia scholars should take a step to create a public opinion amongst masses, then it will be possible to cut the roots of terrorism. With

communal opinion, and public intention only this problem will get resolved. With external interference it does not get resolved.

You have seen our Prime Minister and Army chief went to Saudi and Iran to resolve this. Saudi rejected their proposal, that how can a small kid come and preach us. It is like a servant preaching the master and the master kicks him. They have got this self-esteem that how come Pakistan came to resolve our issue? They don't want Pakistan as their negotiator. These relationships should end. For once everyone should openly say that any country that is Islamic, Eastern, or Western cannot interfere in our affairs, and if someone does then their embassies should be closed and this can happen only with the communal intention and public's will power.

The people, the community who can do this are at a big distance in terms of sense and they have to develop the *Sha'oor*, the Insight (*Baseerat*) in them. When a community makes an intention, determination then a big mountain can also come down and nothing can stand in front of the community's determination. When this sense will develop in the community for their nation, religion, and Islam, only then the sanctities will get protection.

For the people, and community to develop a social sense, an awakening is required but the community is senseless and numb even on severe incidents. There are massive blasts happening everywhere across the country; on police forces and there has been bloodshed across the country. All this is happening and see the situation of the community. They are only sitting on media and counting scores. They are sitting on WhatsApp and sending messages on what is the score in Dubai for cricket and score in the blast of Sehwan. One will say 77 other will say 78. This is the reaction of the community who is only counting scores. They will

express few statements but there is no feeling, or sense and, do not consider anything as their responsibility. This country is burning in fire and we have to get this nation out of this. We are not living in some other county that we live an unconcerned life. The people can do this if they develop sense and awakening, but till the time this does not happen we cannot end terrorism.

As I said one issue was that we do not touch the roots but instead try to wipe off the effects. This will not end terrorism. I have pointed towards three important elements of terrorism which need to be addressed. In order to end terrorism there are two power bases present in the country; one is the government and the second are the people. These two can end terrorism in Pakistan.

All the centers, institutes, and bases which these terrorists have built in the past should be destroyed, if the current state's personnel sincerely want to end terrorism. These are all centers of *Zaraar* (harmful as *Masjid e Zaraar* mentioned in Quran). They are forces of *Zaraar*, Madrassah, Mosques of *Zaraar* which issue verdicts of infidelity for other sects. You do not say anything to these centers, but on the other hand you claim that we will not allow terrorists to raise their heads. The common people are senseless and in the government, there are treacherous people present. But some are trying sincerely like these police officers who go out in the field. Despite of high alert in Lahore the topmost officer, the DIG went out to negotiate with the drug mafia to open the roads. There was some passion inside him that he himself went out else he would have not taken the risk and sent someone else. There are some courageous and sincere persons but there are treacherous who make them ineffective.

The government power base has become corrupted and the power base of people lacks sense, and the ground is now under the control of

terrorists, and those nations, and agencies behind these terrorists are controlling the ground. When there is no one there to uproot these and only effects are being targeted then there would only be insecurity in the country, and under insecurity nothing can happen; neither the education, the living, the business nor anything else. Even you cannot play your cricket match in the country if the nation is insecure. Then the only thing that will happen is that Pakistanis will run from the country. This is not the right strategy that people should run away. Those who have developed sense should educate and awaken others. A communal willpower has to develop inside the community to end terrorism, to bring peace to the nation then there will be support from Allah. When other nations of the world can be peaceful then Pakistan also can be peaceful. But if everyone is self-oriented and not concerned with others, then this irrelevance has left this ground open for terrorists.

A complaint I have is that the Pakistani community has become unconcerned with all these and have just being mourning; considering themselves as helpless. They think we have no role to play in the country and they believe we cannot do anything. They have been ascertained that you are useless, you cannot do anything and you should be ready to die by an explosion and you cannot do anything to establish peace. The community should come out of this thinking and complex, then they can effectively fight against terrorism. If the community kicks off this evil triangle and hate this triangle, which means the three towards whom I have pointed above, this community can finish this terrorism today, only if they develop this awareness inside them. But communities do not awaken like this, and calamities do not awaken people easily, in fact they become depressed and sit hopeless just counting their days of death. This community is also counting their days as to when the time will come and we will be relieved. This is not true; the actual inheritor of Pakistan is the community of Pakistan who are just sitting in a corner with an inferiority

complex; that we cannot do anything and accepting everything as a destiny. They are like a widow who has no one to support and only mourns and cries. This should not be a situation for us, or else this nation will drown in front of our eyes and everyone will be drowned and victimized. Even those who are watching as spectators, unconcerned they will also become victims. This is because Ameerul Momineen (a.s) says that *Fitnahs* have no eyes, they are blind and they burn everything wet or dry.

Hence the Pakistani community needs to be aware and awakened. They should not just sit and expect certain organizations to do something, because these organizations themselves have terrorist elements inside them. These terrorists also know that this community has become terrorized now. If they are terrorists and responsible for ruining of this country then terrorized people are also equally responsible. Terrorism is done so that people get terrorized hence if people come out of being terrorized they can end terrorism. It is the resolve of communities who can do this. If you see Iraq it is the communal movement which is beating ISIS and disgracing ninety nations. In Pakistan also, we can do the same if the community makes up this determination we can kick these infiltrators out from our land and purify Pakistan from the cancer of terrorism and this evil triangle.

Path of the Islamic Revolution and Imam Khomeini (r.a)

As said earlier, due to internal problems as well, the true face of Revolution could not get presented to certain other communities the way it should have been done. Those who wanted to give preference to *Iranianism* above the Islamic Revolution like Ayatullah Rafsanjani, may Allah have mercy on him as he has left the world; all this was done based on his beliefs. He owned the leadership of this thinking and vision that we

don't have to construct an Islamic Ummah but instead make and develop Iran. Iran is for Iranians and he got people near Iranianism. Some people have created unnecessary sensitivity towards the revolution by closely associating it with Iranianism. It has gone to this level that Pakistanis for which Imam (r.a) said; that they are loyal people possessing high values, has also been distanced from the Revolution under the pretext that they will have to suffer a lot due to any association with the Revolution. This is a misunderstanding.

The best people for managing and serving Pakistan are those who possess *Taqwa*. Those who get nurtured in the laps of revolutionary and Islamic teachings would become loyal to Pakistan, or else traitors, betrayers and traders of the religion and the nation will get born. Like for instance Trump imposed restrictions on seven countries and these countries started to plead in front of him to forgive them, that they will not do it again and to please grant them permission to come. Amongst these nations only one country that too one specific group inside this nation carried out a counter operation that Americans are also banned from entering Iran. The entire world has seen, but what is that thing which makes someone to do like this, to stand against Satan and make people prepared to confront Satan? That is not Iranianism, and those who have Iranianism they are still in the state of *Ruku* whereas other Muslims are in state of *Sajdah*. There is a picture on internet which is very good as it shows all Muslims praying towards White House. At present all Muslim nations are in state of prostration in front of America and one category in Iran is also bending towards them, but there is also one other category that is standing firm with a broad chest in front of America. Who are they? They are the ones who were nurtured by Imam (r.a) and have the soul of revolution inside them. They do not accept the dust of their land to be touched by America. So, is Pakistan not in a need of such persons who would not allow anyone to come near Pakistan? Who will make such a

community? Following Iran and following the Revolution is different. To remain unconcerned with Revolution is treachery, irrespective of the fact that if someone is doing this sitting inside Iran or outside.

The Islamic Revolution is a trust (*Amanat*) for the entire Muslim world. The school which Imam (r.a) revived was for the dignity of the entire Muslim Ummah, and today Pakistan is in the need of dignity the most, because that has been stampeded the most by all Satanic powers from West, Arabs and traitors inside, who have done big violation to the sanctity of Pakistan. Today the passport of Pakistan is defamed and you can travel and see for yourself. Even if you visit Afghanistan and Arab nations or anywhere else, they make Pakistanis stand in separate queues, as they are all considered terrorists. Is it not our right to clean this bad image and come out as a respected, disciplined and a sensible community? Under which school and Ideology will the world accept you as a dignified nation? Apart from the school of Imam Khomeini (r.a) there does not seem to be any other vision.

Today Pakistan is in such a wounded state that there are wounds all over its body. All these wounds need ointment. Everything on the body of Pakistan has been wounded and surgery has been done on it. This wounded body needs treatment, or ointment, and that is not corruption and not to earn from here and spend outside. This is a direction in Pakistan now, by which big businessmen earn from here but they spend only few days in Pakistan. Their family, children are all outside and then they claim that we are the lovers of this nation. If you are loyal to the nation then keep your family here, let your children be here. But even if they catch a cold they go outside for treatment. What arrangements have you done for the nation that you don't even want to get simple treatments inside the country? They all go outside but what about millions of these people? What kind of medical system have you created

for them? You have started such a poisonous educational system in the country just for the sake of business, that you don't want your own children to study in these systems. Why don't you keep your children here? Let some media show some courage, and produce a list of all Pakistanis who are on big positions, and statuses here but their families stay outside. Like in Afghanistan all big position holders, religious or non-religious, their children study in India. The Afghans get their treatment done in India. There are special arrangements done in India for them. All these big *Mujahedeen* of Afghanistan, none of their children are in Afghanistan, all of them are in India. See what they have done to their nation that if they want to get their tooth extracted they go to India. I am referring to the rulers not the common masses. The ordinary people in Pakistan have to get treated here, only in this medical system but why these rulers, or bureaucrats don't get treated here, because they know what they have built here.

There are deep wounds inflicted for seventy years on Pakistan and its community. These wounds have been infected now and which vision is going to cure them? You have seen by going near the West but these wounds could not get treated. Then you went close to Arabs and they gave new wounds. Now you have found another physician as China, but they will not just cure this wounded being, but will take us towards death. Why have we turned our backs towards Allah and went towards West, Arab and China. What is the issue that you don't turn towards the system of Allah? The same wounds were on the body of Iran and its Iranian community, and this great leader Imam Khomeini (r.a) cured these wounds through the system of Allah and give dignity and honor to this nation. We also have the same path in front of us, but by painting this revolution political, and adulterated due to the negligence of some and the enmity of the others, and some who are following the west have distorted the vision of Revolution. Those who were responsible to spread

this revolution are guilty of this. Those who carry the pain for the nation and the community are also guilty of this, because they keep the pain for the community and the cure for this pain is also known to them, but due to prejudice they don't go near it. At least you should study this vision and make your people aware about it. The level of importance you give to China, at least give the same level of importance to the Revolution. We can get salvation from China but we cannot get it from Islam and Quran? We have an experience from this century that a slave community which had submitted everything of theirs to America was given salvation with a respected, dignified life by this vision. If this appetite of Islamic revolution can blow the spirit inside them, then Pakistanis are way ahead when it comes to emotions and strong sentiments.

These days come and pass, and people are busy with their occupations but the well-wishers should use this opportunity. Even if you become selfish for the sake of the nation only, still everything that can become the basis of salvation of Pakistan should be considered and spread. It should not happen that due to the pressure from the Arabs and the West we abandon our self-respect as well. A standard (Flag) of dignity has been raised in the neighborhood of Pakistan, and we should raise that standard in our nation too, by every category of people here. But the first responsibility is of those who are associated with this revolution but they have also done treachery with it. The minimal treachery that they did is, they have presented this Islamic Revolution as an Iranian Revolution. Iranianism is for Iran whereas this Revolution is for Islam and Imam Khomeini (r.a) is for everyone.

Pakistan and Iran Joint Action Plan to reply Trump

On the first day of 2018; Trump the accursed got up from his sleep; first thing he did was sat on his computer and issued the first message for Pakistan. That message was that Pakistan is a liar, they have cheated us, we have given 36 billion dollars to Pakistan to end terrorism but they have not done anything. This was the message on the first day of New Year which he has given. Since the first day of the year is a day of celebration for the Westerners. They give gifts, send greetings to each other but Trump did not start the year with greetings but instead threatened Pakistan that they are cheaters and have taken 36 billion dollars in 15 yrs and have not done anything. Yesterday he has given an ultimatum to Pakistan for 48 hours to start some operation else Trump will start his actions on them. This is an abnormal thing for Pakistan that those whom Pakistan has trusted behave in this manner.

The accursed step for Pakistan was when the delegation from Pakistan went to America around 1954 to start their friendship with them. From that day the destruction of Pakistan started which has reached here. The current Foreign Minister of Pakistan has issued this statement that on the instructions of America we have filled the prisons of America that is Guantanamo with Pakistanis. It is the worst prison in history which has been filled with Pakistanis and our Foreign Minister has expressed our services. We have handed over our airports, lands, depots and you started a war in Afghanistan and we handed over our country at your disposal. You made terrorists and put them on our back and now you are telling that we are not able to control them. This is the formal statement of Pakistani Foreign Minister as to what foolishness the Pakistan rulers have done on the instructions of America. Trump has said we have given you 36 billion dollars in last 15 years but what has been given 45 yrs before has been also much more. It is evident that people like Zia ul Haqq and

Musharraf come into power; then they associate their illegitimate power with America and start to take funds from them. They rent out the entire nation to America with various excuses. Now Trump is asking accounts from them that we have paid you 36 billion dollars to end terrorism then why you are not doing it. The Pakistani community should also ask their rulers why you took this money and to take this money is a crime as you have sold the nation to them. They are all criminals who sold their country to a Satan for 36 billion dollars. This statement of Trump has increased threats for Pakistan.

We should pay attention to this fact that there was a slogan which Shia community taught to everyone but they themselves have forgotten it. That slogan was “One who befriends America, is a Traitor of Islam”. This is the outcome of that treachery. The natural result of friendship with a Satan like America is this only. The actual traitor is not Trump in fact they are those who have handed over the country to America but our community remains silent. They express a little in a fearful manner against Trump but those traitors of our country who have given all this to America they don't do anything about them. This is not the first time America has insulted Pakistan and this has a big history on how much insult they have done and every time they have said anything about Pakistan it has been an insult only but they have not heard a reply single time from Pakistan; neither from community nor from the government or politicians.

No one replied because they are all lovers of America. All your rulers have dual nationality of America; their children stay there, they have bank account there, they have investments in America. They reach America on the second day of retirement. If some media, researcher can do this work to find out how many Pakistan rulers, Generals and patriots are in American after their retirement. Army Generals, court Judge, bureaucrats, Minister, President all after retirement go to America. Every children of

this community are desperate to go to America. Those who are raising slogan of Anti America they are the first ones ready to go to America. We have accepted disgrace and Trump takes advantage of this disgracefulness of ours. He knows that he is addressing a nation who will not give any reply to any insults. And we have not given any reply. He has issued a statement on 1st January and today is 5th January. What have the Pakistanis done in these 5 days? The government has called a Cabinet meeting and decided that we will not rush. This is a disgrace. The same day they should have got the American Ambassador out from here and the Pakistani Ambassador should have been called back. The American Embassy should have been closed and all contracts, agreements should have terminated. America said that we will not give any aid from now on to Pakistan. It is natural that those who are fed on aid cannot do anything. You can see where all these aids go. One aid comes for government rulers, one comes for special defense forces and one comes for people as US AID. You can see the banners of US Aid on Shia homes as well. He is also eating the bread from US Aid, he is taking sugar, sheep from US Aid. When the belly of every Pakistani has US Aid; inside Minister, forces and scholars then Trump has the rights to insult. But a zealot, self-respected community does not feed themselves with such aids. We should throw this inside gutter and do not allow these aids to reach your localities so that they don't do this disgrace to us.

The biggest tragedy of Pakistan is that there is no comprehensive policy for the country. We work on daily wages system and just think about today; we eat and then sleep and then get up next day to decide what we have to do. China, America makes policies for us. The financials institutions makes polices for us whether we should give birth to children or not. A community which is not having this much sense and for whom IMF tells whether you should grow your population or not then what rights do they have. When there is a policy, a goal, a system and then

under that if we do the defense of our system. There are millions of unemployed youths who have no jobs, education systems, no plans or policies for using them somewhere and not even for national interests. They are left on their own state and private institutions are teaching them. The government has taken 36 billion dollars, so if you have taken this then at least you should have used this accursed money for some constructive work in the country. Two fundings have become the basis of destruction for Pakistan; one is the wealth of Ale Saud and second is the funding of Trump.

The selfhood and self-respect of Pakistan nation and community can only get us out of this disgrace and not the politicians. The politicians are desperately hungry for the bones of power. They are hungry to this extent that they don't realize what they are doing, what they should do for the sake of power. Look at the religious people what they are doing for the sake of power. They have become blind for power and they cannot give salvation to the community as they lack selfhood. This selfhood should get developed in the youths of this nation. These youths should develop this self-respect that we should not be disgraced. The rulers, politician eat the Mooney and we suffer disgrace. Pakistan is trying to reply on this; they will go to Saudi and ask them to plead to America and make them talk; then they will go to Britain to seek help or they will accept all the demands to catch so and so network and do what they do. But this is not the solution.

The Supreme Leader used to tell that if you listen to one demand of America they will force you to accept hundred more hence do not accept even the first demand from them. But the Iranian government also did not listen to the leader and accepted their demand on atomic negotiation and now they are demanding from them to stop missiles, stop supporting Hezbollah and now they even say that religious clerics should come out

from government and end the system of Wilayat e Faqeeh. Do not arrest anyone on the instructions of America. If you want to break any organization do it on your own and not on the ordinances of America. You restrict some terrorist entity because they are threat to Pakistan and not for the sake of America.

At present Iran and Pakistan both are under the similar crisis. America wants to punish Pakistan for the sake of friendship with China. What should Pakistan do now? They should give reply to this insult and reply should be the same which Imam Khomeini (r.a) and his followers gave to America. Shaheed Beheshti gave a historic statement when America was perplexed and the American President at that time also was issuing such crazy statements. He said; O America become more and more annoyed with us to the extent that you die out of this annoyance. This was the same reply which the Supreme Leader again gave to America few weeks back when Trump tried to insult.

At present for both Pakistan and Iran the best reply which they can give to America both against their insults and conspiracies is in Afghanistan. At present America is under captivity in Afghanistan. The crisis which are there in Afghanistan then under that crisis they should give them a blow. If America can be beaten up somewhere brutally then that is Afghanistan. This is the reason Afghanistan is very important. America has already got all the Takfirist waste from Iraq, Syria to Afghanistan using Arab wealth. This 48 hrs. ultimatum which they have given to Pakistan and he has left it dotted as to what they can do. They will do Drone attacks, they will send commandos to Lahore and will take anyone out they want and Pakistanis will remain observing. Both Iran and Pakistan are undergoing similar issues from Trump. Trump is targeting both Pakistan and Iran but remember that his actual target is China. In order to reach China the countries that are on route he wants to first manage them; and they are

North Korea, Iran and Pakistan. The interests of Iran and Pakistan are very close specifically as regards to Trump policy they are one; he wants to finish both; he is giving deadlines, warnings to both.

Today Trump has called for United Nations meeting related to the protests in Iran. At present Pakistan and Iran should have the same strategy as their enemy has the same strategy for them? They should adopt this action plan and Afghanistan is that place where America can be disgraced like Vietnam and even Afghans can also get relieved from the terrorism. What kind of logic is this that you get all the terrorist from the world in one place? America has done this to go after Iran and Pakistan. The same way they gathered terrorists in Syria and Iran, Russia, Hezbollah disgraced them over there and now it is the turn of Iran, Pakistan and Afghanistan. They can take help from China, Russia and give this accursed a lessonful defeat in Afghanistan so that they get destroyed there.

Ale Saud did one more thing that they called Pakistan rulers to Saudi on one phone call. They are always ready to come on one call. One day Mohammad bin Salman will also say that they have taken 36 billion from us but not done anything. Trump has said this already and similarly Mohammad bin Salman will also have to say this one day that Pakistan has not done anything for us. For the Pakistan rulers if you are taking Rials from Saudi, then take but don't put Pakistan on the same direction as they want. Mohammad bin Salman wants rented people, labor, forces, and terrorists from Pakistan. He knows that entire Pakistan is on rent. This intellect should be there in Pakistan that they should not go on rent and don't do whatever they want to do.

We have to take these steps and we pray to Allah to secure Pakistan from internal and external threats. May Allah destroy these roots through his

army and we pray to Allah to protect all the Muslims wherever they are under aggression, oppression and tyranny.

Chapter 5

70 years of Independence

Speech delivered on the Independence Day (2016)

Today the biggest difficulty of the Muslim world is the never-ending insecurity, and Pakistan is the most insecure internally as well as from outside. The Independence Day of Pakistan that is 14th of August is near and even if we don't celebrate, still it is there. The day of freedom which this community witnesses every year is soaked in blood and is not seen by any other community.

This year also a large majority of innocent people in various places across the country have become victims of terrorism and a large number were wounded. They all deserve sympathy and we are with them, praying for these martyrs for the blessings of Allah and may Allah give patience to their families. Amongst the bitter things happening with these events, one of them is the fact that such dark clouds are hovering over Pakistan. But for the Shias of Pakistan this incident is not the first one and neither the last one. The community which is a victim of these brutal terrorist activities for the last thirty years; and has seen nearly two hundred corpses at once in the same city of Quetta and Parachinar several times. We have seen those tragic scenes and in every city such tragic scenes have been witnessed by Shias. We have full sympathy with others about any terrorism incident happening with anyone; but a sad reality is that when such an incident happens with Shia neither those in power, the politicians, the religious people or the general masses consider that incident as an act of terrorism.

Why do they differentiate between two incidents? When lawyers are attacked everyone is sympathetic but when Shias are targeted why there

is no sympathy towards them? Shias should also be dealt with sympathy, affection and emotional exchange of words at least, Shias are also living in this country. You listen to the journalists, the political analysts, the writers and sometimes when they write about terrorist incidents they will write about Peshawar school attack, court and others except for any attack that was done on Shias. Are these only the incidents of terrorist attacks? They do not count even once the terrorist attacks that were done on Shias. From Karachi to Parachinar the land of this nation is colored with the blood of Shias but no one considers it as terrorism. They do not even record those incidents under terrorism. But Shias have sympathy towards every one, those who have been suffering from these attacks continuously, know the most about the pain which lawyers, doctors, students, police and their families are going through. We are unlike those lavish people, those who when they come out of their state of drunkenness, issue one statement. Instead we have more sympathy because we have tasted all of this before.

They are voicing the reasons and causes behind some of these events. Some say that this is being done to spoil the China Pakistan relationship, some say India is behind this. Every incident is not a new case and it is a link to a series of incidents going on, it is a part of the chain of such incidents that have been going on. We can see the non-seriousness in every incident just like all previous incidents, where every group has demonstrated non-seriousness.

Terrorism in Pakistan is a clear reality. There are groups who are supporting this, organizations who are leading and running them; there are scholars, centers who give them a terrorist's vision and justify their acts. The ones who issue the verdicts to kill other Muslims and justify them, are all dens of terrorism and fall under the category of terrorism. The ones who issue the verdicts to kill, those who arrange the means, and

those who justify it are all part of terrorism. Everyone knows who has sown the seed of this terrorism, and the government nurtured it, and the foreign countries are supporting it, and is there any blind person who says I am not aware? The government officials know all of this, and when these officials sit in personal gatherings they speak such things that you would be astonished to hear them. These officials see everything and when they interact with each other they take names and they say who is behind all of this. But when they come in government positions in public, they give such statements that unknown people have done this, until now no group has claimed responsibility etc. Woe on you that even after thirty years for every incident you wait for someone to accept responsibility of the attacks? If you are so ineligible then what is the need for you to sit on such governing positions, that unless the killers disclose you won't know who has done this? These terrorist groups and forces were made inside this country, from the funding of *Al-e-Saud* for the assassination of Shias. But those who made these groups, and forces they were unaware about this universal rule that when you train beasts and nurture them in your laps to attack others you can also become a victim of those beasts. Those who make them can also become their victims and it has happened. Those who made ISIS suffered from their own hands.

For every incident they issue the same statements in the news every time, and then they will also put the incident under unknown cases; they will issue some charity checks to the families and then everything will be forgotten afterwards. The politicians play specifically with big incidents because certain people need corpses to do their politics and deceive people. These people are very happy with such type of incidents as they get a chance for their political activities to thrive. The masses should be aware about terrorism, and they should be aware that those from whom you are expecting that they will finish this terrorism, it will not happen from their hands, although they have a formal responsibility to do it. But

how can they end terrorism when they are the ones who have created it and it is their capital?

Saudi Arabia has created ISIS and now Ale Saud is part of the sixty-nation alliance who will fight against ISIS. They are the ones who have spent billions of dollars, taken so much criticism from the world, with so much bloodshed and now they will eradicate ISIS? They will never do that, instead this alliance of sixty nations is made to protect and secure ISIS. ISIS can be destroyed; they were about to end it in Syria then America went inside Syria to protect them, but by the grace of Allah still they were uprooted. The candidates in American elections, the two crazy ones; a woman and a man and they were exposing each other. Trump exposed Hilary and she is saying this for Trump that he has created ISIS. Hilary Clinton has mentioned in her book that we have created ISIS as it was a necessity for us. So are they crazy that they will annihilate them so easily even after ISIS defeats in Syria and Iraq? They have gone through so much efforts to create ISIS and these terrorist groups in Pakistan, that Pakistan has reached the verge of annihilation but still they are not ready to terminate these groups, and they keep supporting and nurturing terrorism. By capturing or killing one or two persons they are showing that they have taken some actions.

In the major attack in the mid of 2016 in Quetta we can say that this was related to the oppression which is going on in Kashmir by the Indian government. This oppression has been ongoing since the beginning and a new wave of this oppression has started in which the Kashmiri brothers and sisters are brutally suffering. We can say in regards to this incident of Quetta that India in order to suppress the wave of *Intifada* which has started in Kashmir has some links in this case. Our rulers' despite of being aware about this do not go in this direction, and consider it to be in their benefit to remain silent. It is necessary for the people to be aware about

this and if they just keep depending on these officials then we will get nothing other than despair.

In seventy years of independence they have taken the country to this state and we are still keeping our hopes alive with them? In Pakistan if you see the governments trend there is a pattern, for one decade the army rules and then for another decade the civil government rules. Every party got the opportunity to rule one by one, except for this one party now whose mouth is also watering to come in power. Everyone came and you have seen what they have done to the nation. They cannot do anything better than this. Economically they are turning the entire country into a Chinese market, they have given the keys to China asking them to come, and eat and also give us to eat. If you observe a general situation in the country it is chaos and panic. If you look at foreign relationships they are also in front of you. These rulers can only do this much and if you expect them to destroy Pakistan in one day than they are not even capable of that. They try a lot to break Pakistan, but they are not successful or even eligible to do that.

Every nation belongs to its people, the masses and they are the real inheritors of the nation. They have to come out in the field and protect their nation, and the worst state is that of the people of Pakistan. They are not serious in any matter and a complete senselessness is amongst the masses. They cannot develop any movement inside them and this is also because of the elite class who has the reigns of the community in their hands. But if you see the major incidents like in Parachinar we can see some reaction from the people. The news does not show the reaction of the people there. They only show some politician sitting in an air-conditioned room issuing some statement sympathizing with the family of the martyrs. These statements are not worthy of what these people are all about.

In most of the incidents there is hardly any public reaction. The people of Quetta in the mid-2016 (August) blast were also unconcerned. The people of Pakistan do not even consider this as an issue or a tragedy of Pakistan; they do not feel the pain, or grief over anything. They have this thinking that the people of Quetta have died, lawyers were killed or Shias are killed so what do we have to do with this? Till the time the people do not develop this sense, realization, develop the sympathy, the pain and grief, the state of this nation will not change and there will not be any security in the country. Until the time people do not develop this sense, or demonstrate reaction, security will not be achieved in this country. The number of people whom you see in some party programs, they also come with big arrangements that are done by that party only. In a country of 220 Million people if a political party is able to get 100,000 people out on the street, you cannot say that this is a reaction from the people and they have developed a sense now. In a city like Karachi if some party can gather 10,000 people we think that this political party is great and powerful. The millions living in Karachi do not consider any issue as their own issue. They have nothing to do with these cases. The people of Pakistan should consider this nation, this land as their own. If people have captured this land it does not mean that your relationship has ended with this nation. If you are not part of planning the destiny of the nation, it does not mean you should remain unconcerned and you have no relationship with the country.

Unless the community's intent gets developed, the situation of the country cannot change. In order to make a communal intention we need serious people, education institutes, religious guides and media who will do this. Our Educational institutes play an utmost irresponsible role in the country. The destruction which these institute are spreading in this country may be more destructive than the destruction caused by the terrorists. Terrorists may kill seventy in one incident, but the educational

institutes destroy seventy thousand in one go. The community is only interested in counting scores. They just sit and watch on television the score of cricket and the scores of the number of people killed in any incident. This way we cannot cure the state of the nation. We should not be deceived by the statements; that we will break the back of the terrorism. How many times they have broken the back of the terrorists but still they come with a broken back to do this? This is because there are networks present who are supporting and justifying terrorism, and till the time they are present, terrorism will remain. Those who are the mothers of terrorism, those who consider that we need a parallel civil force inside their nation to create balance and to move forward, this is their balanced policy. You will have power sharing balance with these terrorist groups? They consider these groups as essential and consider it a loss to annihilate them.

Saudi has made their country bankrupt to create and feed the terrorists. They have come to a point that Pakistani laborers in Saudi are starving, and Pakistani government has sent 300 million rupees to Saudi for providing food to these Pakistan workers there. Then they will arrange for their tickets and after *Hajj* they will move them out of there. Such a wealthy country has become bankrupt. Why? They have become blind in the hostility of Shiite. They are spending money across the world in order to destroy Shiite. They made a new announcement in 2016 that Hajj and Umrah visa won't be free and it will cost 2000 Saudi Rials. Such a rich country is selling their Visas. No nation sells their visas, the fees are only for covering the admin costs. A nation is selling their visas because they know the sacred places are present there, and Muslims in the world are obligated to come there for *Hajj* and *Umrah*. They have made their economic policy based on Hajj income. People will pay and go there. They have done an audit and drafted their budget which is dependent on Hajj revenue. This country who has bankrupted their nation for this, will they

allow to end terrorism? The Imam of the Lal Masjid who openly justified terrorism on TV, and everyone was after him but they still could not arrest him because Saudi is behind him. At the time of Friday prayers, they switch off mobile network so that this Imam of Lal Masjid should not be able to give sermon on Friday from home, but they cannot catch him. So can they end terrorism in this country? A person as an example I am using, they cannot arrest him then how can they claim they will end terrorism in this country? Were these terrorist groups, forces made on their own? They have owners and inheritors who would not allow these forces to be annihilated. If you want to end terrorism then first break the relationships with these terrorist sponsoring nations like Saudi, shut down the American Embassy in Pakistan, then carry out operations against terrorism in the country and clean them. Until the time the mother of these terrorists is present who is feeding them, how can you change the situation?

One the other hand India with a great appetite of revenge against Pakistan is active in every field, and every policy of Pakistan. It is not a simple issue that their only enmity is against this China-Pakistan pact (CPEC). There are enemies of the people of this country; of the Muslims present inside this country and they have deep roots inside it. With all of these ground facts present and by ignoring these facts they claim that we will terminate terrorism. This cannot happen without the intent of the people, the community and the masses. In order to create this will of people, certain categories of people have to come out and do this. If you are not accountable here but you are definitely accountable to Allah. Allah will question that you were present and everything was happening in front of your eyes, what did you do? It is the Independence Day and even before it arrives they have soaked it with blood. The previous incident that took place two years ago was in the month of August in Quetta. This was the plan of the enemies of the Independence Day of Pakistan, whose

one glimpse we have seen in the last few days, but now what is the plan of the Pakistani community for the Independence Day, this needs to be seen. Just by raising flags and have a national day off is not enough. Think beyond this also, and we shall discuss in details in the special program of the Independence Day.

Shias are suffering with every problem in this nation and also globally Shias are the prime victims. These issues also need attention and the best occasions come for communities, and the masses to rise but since there is no awakening, these special occasions and days come and pass by. Every individual is responsible at his own level. The Pakistani community hopes for Heroes who should come and solve all the problems. Since childhood they see cartoon films and this becomes a community mindset that they worship a Hero and wait for the Hero. When they do not get a Hero they try to create Heroes. If there is a Hero in a community it is good for him, but for a community it is not good, because a community who is waiting for a Hero to do something does not deliver their own responsibilities. The mentality is that we don't want to do anything since we are hero worshippers. Quran has introduced an *Uswa*, a role model who comes and makes the people deliver their responsibilities whereas a Hero is the one who himself does everything. Hero cannot save us, they are only in films whereas in the real world *Uswa* (role model) is there. Heroes are not the real need of the communities, but at times certain cultures are present who nurture Heroes that are of no use to the communities. Communities themselves can get salvation by taking inspirations, gaining sense, and education from the role models. We should learn the lessons of freedom from *Allama Iqbal*. He is teaching us what is meant by the freedom and has the liberty plan for this nation. We should refer to this role model, this teacher and a leader of thoughts. He will give you the roadmap which he has but we have never referred to him.

The people of Pakistan should really get real freedom. A freedom from our internal diseases, our habits and the shackles which we have voluntarily put on our feet, we should get freedom from them, the shackles which the enemies and the capitalist systems have put on us, we should get freedom from those, the locks which have been put on our lips should get unlocked so that they are free to speak, our tongues should become free, our feet should become free so that we can move to save this nation. Who is playing what role in this nation? Maybe 22,000 are active, the rest of the 220 million have no chosen role in this nation. Till the time they do not deliver, nothing will happen. In every nation the role has to be played by the masses, the role of the leaders is to awaken the masses and then the masses have to play their role, the way Imam Khomeini (r.a) awakened the nation.

This lesson of freedom is for everyone and even Kashmiris. The Kashmiris also until the time they are depending on their supportive hired groups in Pakistan, who themselves are owned by others, they will never get freedom. How can you follow these borrowed groups who themselves are not free, and you are depending on them to give you freedom? The people of Kashmir should independently and having reliance on Allah strive for the freedom of their land and the community. They should develop self-confidence inside them and they can do it. Those Kashmiris who are not dependent on others, although in minority will be more successful than those who are relying on these rented groups from Pakistan. Their so-called supporters are themselves hired, they are taking fees and carrying out assassination of Muslims.

Everything in this nation is rented and sold out. Sometimes a *Bedouin* from Saudi Arabia, or Bahrain comes to purchase the army, the people, the leader, or the labor, is this a market? This nation has its own dignity, status, self-respect and honor. Why has Pakistan been turned into a

market? They come and buy so many for Yemen, so many for Bahrain. Is this a slave market? The sense of honor should be comprehended by this nation. By running away from this, the nation's problems do not get solved. Whenever any incident happens we plan to run away; take our children, and capital everything out from here. We just want to run and find some place somewhere else, and is this the strategy by which we want to save Pakistan?

Everything can happen and change only with the masses. Even if a Prophet, Imam is present but if the *Ummah* is not present in the field, nothing can happen. You have seen in Karbala, Imam reached there, but *Ummah* did not reach there. Since twelve hundred years, Imam is present but *Ummah* is missing from the field. The secret of occultation of Imam (a.t.f.s) is only this that the *Ummah* is missing. The *Ummah* only considers this as their duty that we should produce children, get jobs, earn, live and then next generation will come and do the same. If you do not consider yourself responsible for the nation, for our ideology then this will only continue and the country will be in the hands of these beasts only. May God forbid that it should happen that Pakistan forever becomes theirs, and that would be a big destruction. These tragic incidents, the Independence Day, and our religion are all giving the same message and the demand of *Taqwa* as well is the same also. *Taqwa* also means to protect, and secure the nation through divine planning. Through *Taqwa*, secure this nation so every category of people in this country lives with security and dignity.
